Forecasting of earthquakes in July 2023

The quality of time at the birth of a human being in August 2023

In midlife, in their early 40s, many people experience a crisis, a low point in their lives. What happens after that? Is there a departure for new shores or does everything stay the same? In the middle of life, paths diverge and so do spirits.

If everything stays the same, physical decline increasingly becomes a topic for the individual future.

If we succeed in seeing new horizons in the course of life, spiritual further development is possible and the incipient physical decline becomes secondary.

In the biographical rhythms between the 42nd and 48th year of life, the course is set for the further course of life.

Into which quality of time were famous contemporaries born? We will investigate this question using the birth of Albert Einstein as an example. Are there special constellations on his birthday?

The investigations have shown that it concerns a very mysterious, scientifically not explicable time quality, which concerns not only Einstein, but also 16 other famous quantum physicists.

Your Wave Astrology Team

Harmonie und Disharmonie im August 2023

Let's look at the harmony and disharmony in August 2023:

Figure 1; The quality of time in August 2023; full moon is on the 1st, new moon on the 14th.

The full moon (August 1) initiates the relatively disharmonious month of August. At the same time, the Sun, Moon (fluctuating), Mercury, Saturn and Uranus are disharmonious at full moon time. This disharmony is further enhanced by Venus. Only Mars counteracts this. Move what you can move during this time. If that is not possible, watch your words so that they are not hurtful. Be sure to keep a strict order in everything you want to do and start during this time.

From August 6 on, the quality of time becomes more harmonious, mainly due to Mercury, Mars and Jupiter. What you have been putting off at the beginning of the month, you are now starting. From the 23rd of August it becomes more turbulent again. Saturn causes disharmony, as does Venus. Partner relationships become easily chaotic - caution is advised.

Positive (harmonious) is Pluto at the end of the month. Try to ride its wave and destroy old things that have been bothering you for a long time and build up new things. "Die and become" is the motto here. However, always remember that Saturn can easily cause chaos at this time. But out of chaos often arises the new, and this also applies to interpersonal relationships.

Even in the Middle Ages, people knew, "The stars make inclined, but they do not compel." In our today's words this would mean strongly simplified: "Everything is more or less probable and moreover relative".

On August 9, the Moon and Pluto are in harmony. Will a quantum physicist be born on that day? Look at the contribution "The mystery of Einstein's birth".

Figure 2: The energy of the quality of time in August 2023

Biographical rhythms from the 42nd to the 48th year

The course of life is subject to various methods of order and structure and proceeds in rhythms. The methods of wave astrology are based on the rhythm of Jupiter as the rhythm of growth. The whole evolution is based on development, so is the life of man.

The cumulative curve shows a clear drop into disharmony between the ages of 40 and 45. The major rhythm generators in the biography come into tension and reinforce each other. In psychology, one speaks of the beginning of the midlife crisis, a major phase of upheaval in life. These are experiences that are visible in numerous biographies and are often processed in literature. Individually, the times of crisis can shift somewhat.

Figure 3: Biographic rhythms from 36 to 48

Not every personality gets into a very difficult situation at this age. The disharmonies of Jupiter, Saturn, and Uranus can also indicate that the issues associated with these principles are coming more into awareness and want to

be thought through. Uranus, for example, also has a connection with foresight, with intuition, with reform. Uranus is considered the octave of the thinking planet Mercury. It is thus about higher spirituality, about sudden ideas and inspirations (flashes of inspiration), about thinking directed towards the future. Those who intensively occupy themselves with such thoughts and become active during this time can sometimes live through the years without major emotional burdens and ruptures.

But for many, the sudden uncertainties, the escalation of an unpleasant situation, difficult decision-making situations come unexpectedly and lead to the great turning point in life, the "midday revolution" in life, as Carl Gustav Jung, the "therapist of crises" had called this phase of life. The loss of inner harmony in one's early 40s can be a shocking experience. If everything was still well-ordered and with a clear perspective just a moment ago, a new feeling of insecurity can suddenly arise or the (seemingly) secure outer world or inner world comes apart at the seams.

You see the disharmonic curves of Jupiter, Saturn, Uranus and Neptune.

At the age of 41/42 Uranus forms the opposition to itself, in some biographies, however, only at 43/44 years. Uranus is also the principle of change, of great upheavals and the search for freedom, for new challenges and individualization. The free, self-responsible development is an essential topic at this age, which often leads to difficulties, because the personality is squeezed into fixed structures.

The uncertainty in the opposition of Uranus is reinforced by the opposition of Jupiter to itself at 42. The personality is often dissatisfied with the current situation in life and again in search of meaningful ways to shape it.

Neptune forms the first square to itself at 41 / 42, which is also an astrological constellation that can occur only once in a lifetime. This increases the uncertainty and ambiguity about the further course of life. Under a disharmonious transit of Neptune the danger is given to deceive oneself, to make wrong decisions out of illusions.

The curve of Saturn is also in disharmony at 41/42 years. At about 44 to 45 years Saturn finally comes into its 2nd opposition to the natal position. One can also speak of a second puberty. At about 14/15 years Saturn was already once in opposition to its position at birth. It is puberty that every adolescent has to go through with individually different difficulties. The disharmonies of Jupiter and Saturn repeat themselves in the early 40s and culminate in the opposition of Saturn to the natal position in the mid 40s. It is the analogy of puberty, but at a mature age. Again it is about the search for one's own identity, about letting go of unloved duties and structures.

In this process, one tries to relate what has been achieved in life to current needs and original life plans. It is often a primarily inward-looking process. In the process, one's gaze may fall on unused opportunities, seemingly flawed decisions, and misguided paths. Many feel constrained in structures that no longer fit or are no longer wanted. Duties (Saturn) seem to be manifested. For the actual talents (Jupiter) the everyday life filled with duties and responsibility rarely leaves room. It is problematic that the social environment often has little understanding for the mental and spiritual difficulties of the person concerned, in contrast to puberty in adolescence.

The balance can lead to depression, or it can lead to activation that points to the future. Those who get into a life crisis at the age of early to mid-40s because of the feeling of hopelessness go through the midlife crisis. There are numerous psychological studies on this. The duration of this major upheaval phase in life varies from individual to individual. It is a crossroads in life, often a radical life change, an individual revolution. New values are sought.

Carl Gustav Jung points out for this age that what the youth found and had to find in the outside, the person of the afternoon should find in the inside.

Will it be possible to find one's personal leitmotif in life, or will it sink into the depths of the unconscious? It is a time to take stock of the past years. The finiteness of life becomes clearer.

Thus, the search for the common thread in life forces itself back into thinking. "Who am I?" "What else can I accomplish?" "Is there a life plan for me?"

Those who simply want to go on living as before will have difficulties. At the latest now, the search for spiritual tasks and for something new in life must begin.

Those who do not find answers to these questions and do not recognize any meaning in life can fall into depression. Then he needs help, because although a crisis is gladly called a chance, not everyone succeeds in coming out of this "dark night of the soul" independently.

The path of life becomes narrower. It is necessary to accept certain circumstances that cannot be changed.

At the age of early to mid-40s, a new intellectual - spiritual or creative upswing can be found. At the latest now interests should be developed, which go beyond the everyday life. A phase of life begins in which Jupiter can already play the background music.

Nodes are turning points, which are very different for each individual.

The disharmonies of the principles of growth, concentration and freedom can also indicate health problems and force a different, healthier way of life. Thus, in the long run, these disharmonies are helpful for further life, especially since the personality has already accumulated extensive life experiences and thus has a great overview of life. The "growing rings" (Rilke) have become more extensive.

From the age of about 46, cosmic rhythms stabilize for many. The changes in life have entered stable waters. Life has become manageable again for many.

The quality of time at the birth of a human being in August 2023

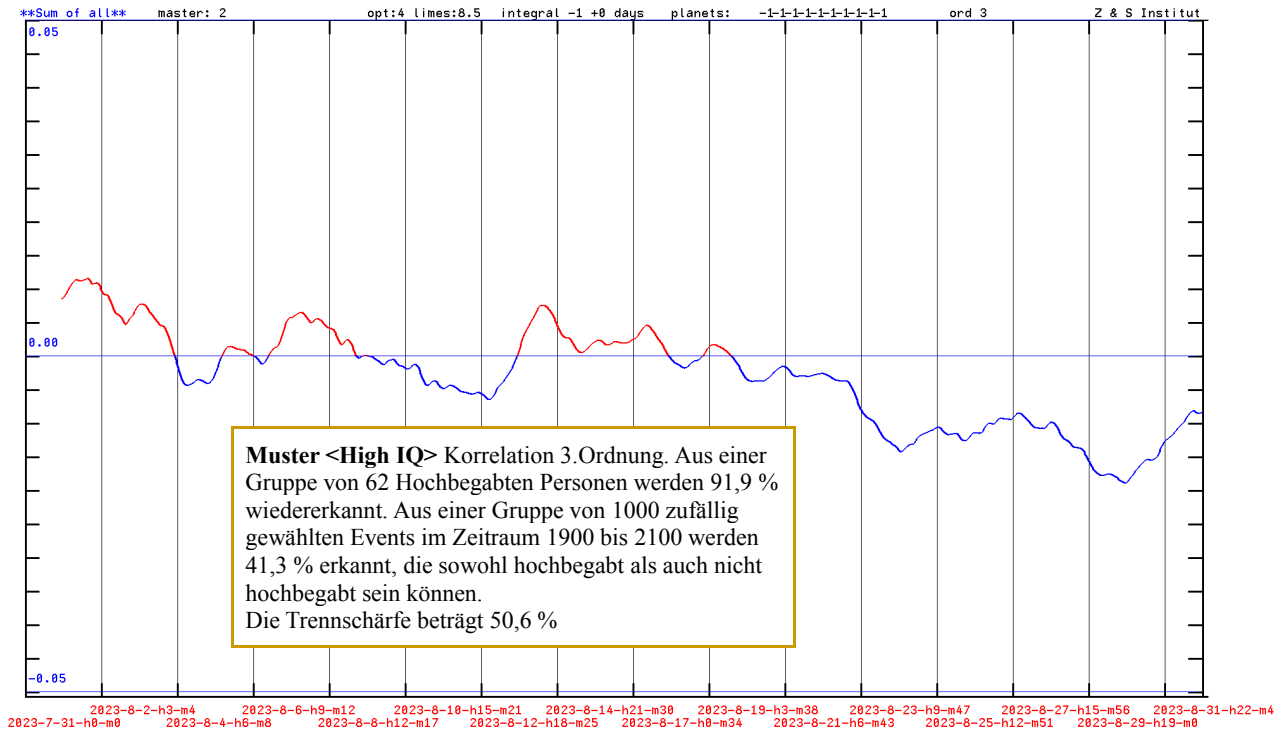

Figure 4: The probability of a higher IQ when a person is born in August 2023. If the curve is above the midline, then this time falls into the "High IQ" pattern for the highly gifted..

Important: During the whole period children are born with a high and a low intelligence quotient. The curves only indicate the changes in probability.

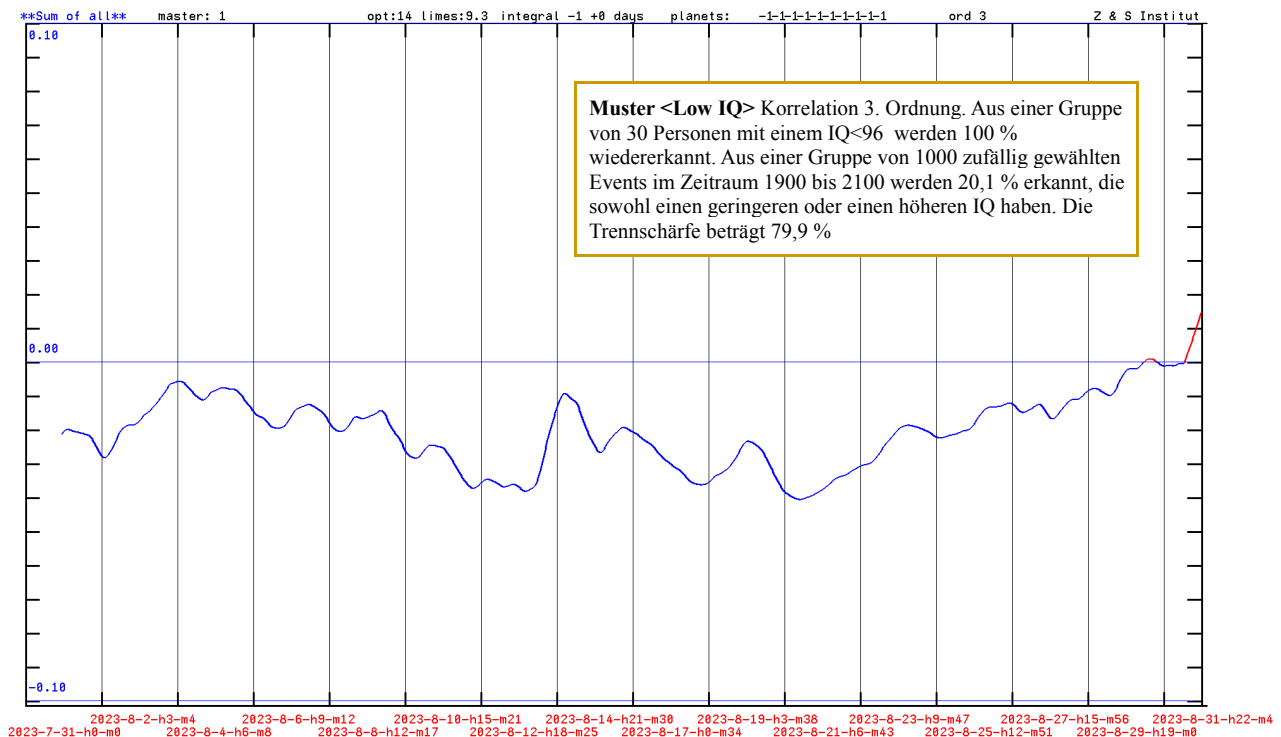

Figure 5: The probability of low IQ when a person is born in July 2023. If the curve is above the midline, then this time falls within the pattern for low IQ.

Can these curves also be used for the start (birth) of projects?
 There is no research on this yet. But it could be a hypothesis.

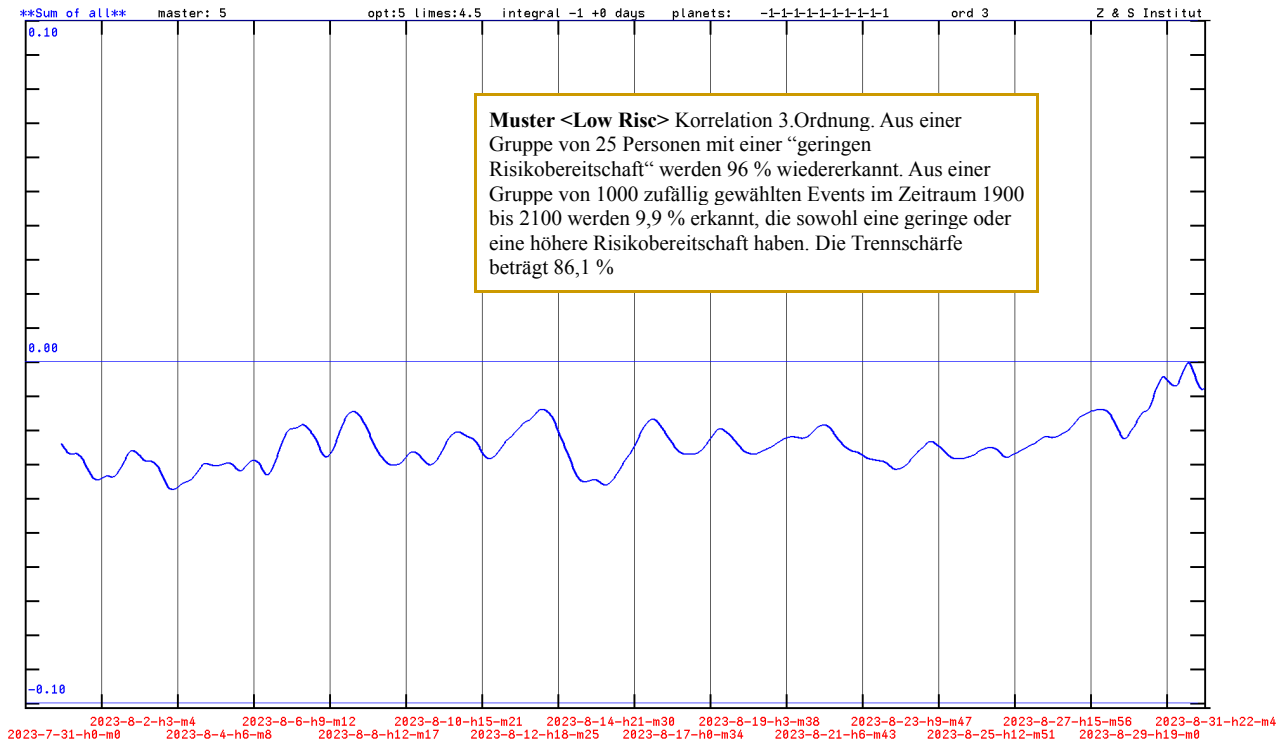

Figure 6: The probability for the characteristic "low risk-taking/strong need for harmony" when a person is born in August 2023. If the curve is above the center line, then this time falls into the pattern for a "low risk-taking/strong need for harmony".

Even these few, statistically validated research studies indicate that there is still a large field for further investigation. For this purpose, groups of people with the same character traits must be studied. If such groups show significant deviations from the continuum (average), patterns can be created for prognostics.

To the interested readers: If you know such groups of people with special, statistically secured character traits, you can send them to us for testing for significance. If it is a trait that deviates from the average, we can create a sample.

Artificial intelligence in the forecasting of earthquakes in July 2023.

The fluctuating planetary gravitational field influences not only activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly chosen control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

Mattern A

Group of the 41 strongest earthquakes of the last century (1900-2000).

The pattern used here finds 100% from the list of 41 strongest earthquakes. However, 25.8% of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) from the continuum is 74.2 .

Figure 7: Curve of pattern A for the period 2023-8. Above the center line, the probability of a pattern A earthquake is greater.

Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or those that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena.) in the time period 1997-01-05 to 2002-06-18].

82% from the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a time period from 1900 to 2100.

Figure 8: Curve of pattern B. 513 earthquakes for the period 2023-7. Above the center line, the probability of a pattern A earthquake is greater.

Important: This does not exclude major earthquakes.

The Mystery of Albert Einstein's Birth

The mystery of Albert Einstein's birth is the mystery of the Moon and Pluto.

“**Pluto** is the largest and second most massive known dwarf planet in the solar system and the longest known object in the Kuiper belt. It moves in an even more eccentric orbit around the Sun than the planet Mercury. Its volume is about one-third that of Earth's moon." (Wikipedia)

Pluto's gravitational pull is extremely weak, equivalent to the gravitational pull of a lead ball weighing 50 grams and about 2 cm in diameter at a distance of 10 meters.

Because of these small physical quantities one is always inclined to regard Pluto as marginal and not to grant it any influence. One is all the more astonished when its influence cannot be eliminated in statistical investigations, as the example of Einstein's birth shows.

Let us first look at the time quality of his birth:

Figure 9: The harmony of time quality 1879-03 (Einstein's birth month). The vertical line marks the time of birth of Albert Einstein.

The birth time is in a local maximum, formed by Pluto, Moon and Sun. Intelligent people are born above average in harmonic times (red area of the curves). This is also true for Einstein.

If one compares Einstein's time quality with 20 000 randomly chosen points of time in the period 1800 to 2100 the following probabilities for the correlation of Pluto with the other celestial bodies result in table 1:

Sun	Moon	Merkur	Venus	Mars	Jupiter	Saturn	Uranus	Neptun	SUM
7,3	0,1	46,8	41,7	17,7	90,9	52,5	11,6	42,3	3,6

Table 1: Probability of Pluto harmony for the birth of Albert Einstein.

The mystery shows the correlation 0.1 of Pluto with Moon. Here, of the 20,000 control times, only 0.1 percent have a higher harmonic. This is highly significant. Of the 9 correlations a hit with this probability ($p = 0.001$) is only probable with 0.009 %. The error probability that it is a coincidence is thus very small. The oscillation state of Pluto as a whole is significant with 3.6% (only 3.6% of the 20 000 control times have a more harmonic Pluto).

Now the question immediately arises: Is this just a special position of Einstein's birth time?

For comparison, following a list from Wikipedia, another 16 physicists who had worked on quantum theory were examined. These are:

- Max Planck 23. 4. 1858 Kiel
- Arnold Sommerfeld 5.12. 1868 Königsberg
- Albert Einstein 14. 3. 1879 Ulm
- Ernest Rutherford 30. 8. 1871 Spring Grove

Max Born 11. 12. 1882 Breslau
 James Franck 26. 8. 1882 Hamburg
 Niels Bohr 7. 10. 1885 Kopenhagen
 Erwin Schrödinger 12. 8. 1887 Wien
 Wolfgang Pauli 25. 4. 1900 Wien
 Werner Heisenberg 5.12. 1901 Würzburg
 Enrico Fermi 29. 9. 1901 Rom
 Paul Dirac 8. 8. 1902 Bristol
 Pascual Jordan 18. 10. 1902 Hannover
 Lew Landau 22. 1. 1908 Baku
 John Archibald Wheeler 9. 7. 1911 Florida
 Richard Feynman 11. 5. 1918 Queens, New York
 Julian Schwinger 12. 2. 1918 New York City

Sun	Moon	Merkur	Venus	Mars	Jupiter	Saturn	Uranus	Neptun	SUM
30,8	0,01	49,5	80,0	51,8	32,8	88,9	99,7	89,4	66,6

Table 2; Probability of Pluto harmony from 17 quantum physicists in the above list.

As a control, even 50 000 control groups of 17 events each were calculated here. Only 5 of the 50000 control groups had a higher harmony of the correlation of moon and Pluto. That in this respect still remarkable, because, except for Einstein, for the 16 quantum physicists the exact birth time was not available and therefore the time quality was calculated for 12 o'clock. The error probability for the 0.01% is only 0.0009%.

Sun	Moon	Merkur	Venus	Mars	Jupiter	Saturn	Uranus	Neptun	SUM
13,2	1,0	91,4	81,7	35,8	18,1	94,9	23,7	71,9	19,6

Table 3: Probability of Pluto energy for the birth of Albert Einstein.

Sun	Moon	Merkur	Venus	Mars	Jupiter	Saturn	Uranus	Neptun	SUM
81,6	0,2	82,7	65,3	66,5	75,0	91,3	0,15	100,0	38,5

Table 4; Probability of Pluto energy from 17 quantum physicists in the above list.

The Moon-Pluto correlation is also significantly high in terms of energy.

Summary - the mystery of Pluto

For the examined quantum physicists the correlation of moon and Pluto is a unique feature, which is not physically so comprehensible.

For the group of the 17 examined quantum physicists can be said:

1. the harmony between Moon and Pluto is highly significant (0.01%).
2. energy of correlation between Moon and Pluto is significantly high (0.2%).
3. the harmony of Pluto with Uranus is significantly low (99.7%).
4. the energy of the correlation of Pluto with Uranus is significantly high (0.15%).
5. extremely low energy of disharmonious Neptune (89,4%) is unusually high significant (100,0%)

What distinguishes Einstein from the group is its harmonic Sun-Pluto correlation (7.3%), and its relatively high energy Sun-Pluto correlation (13.2). Uranus is also more harmonious and energetic than the group in terms of its harmony and energy.

Important: The investigations refer only to the quantum physicists listed above. To conclude from this to other quantum physicists can only be considered as a hypothesis. A mystery, which stimulates further investigations, is it in any case.

Figure 10: image of Pluto (Wikipedia).

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

Guest posts

Do you have individuals, groups of individuals, special events or groups of events?

We will review you and, if suitable, conduct research and publish the results with you in our journal or in an international peer reviewed journal.

Your own research?

If you intend to conduct your own research independently of us, you can purchase the astro-basis program (manual here: <http://www.planetare-korrelation.eu/program-astro-2.htm>). With this program all research results were obtained, which were published in the international journals

Earth & Environmental Science Research & Reviews;

International Journal of Clinical & Medical Informatics;

Journal of Robotics and Automation Research;

Journal of High Energy Physics, Gravitation and Cosmology;

were published.

For further requirements you can also purchase the astro-extended program (manual here: <http://www.planetare-korrelation.eu/program-astro-extended.htm>). This program can among other things also carry out resonance examinations (transits) statistically secured.

Contact us, we will advise you!

Contract research for your personal questions

Do you need quality time for personal appointments, births, or groups of people?

We calculate the time quality matrices for you with statistical tests for significance.

For one appointment we will charge you 80,-€, for groups up to 30 events or persons 120,-€.

Sponsoring

Would you like to support our research financially?

Please get in touch with us. Your support can also refer to individual studies, for example. An internationally published research article can then include the addendum: "This research was conducted by *Your name or company*.... sponsored. In addition, your name or company can - if you wish - be published on our homepage with a link.
