The quality of time at the birth
of a human being in
September 2023

In midlife, in their early 40s, many people experience a crisis, a low point in their lives. What happens after that? Is there a departure for new shores or does everything stay the same? In the middle of life, paths diverge and so do spirits.

If everything stays the same, physical decline increasingly becomes a topic for the individual future.

If we succeed in seeing new horizons in the course of life, spiritual further development is possible and the incipient physical decline becomes secondary.

In the biographical rhythms between the 42nd and 48th year of life, the course is set for the further course of life.

Into which quality of time were famous contemporaries born? We will investigate this question using the birth of Albert Einstein as an example. Are there special constellations on his birthday?

The investigations have shown that it concerns a very mysterious, scientifically not explicable time quality, which concerns not only Einstein, but also 16 other famous quantum physicists.

Harmony and disharmony in September 2023

Let's look at the harmony and disharmony in August 2023:

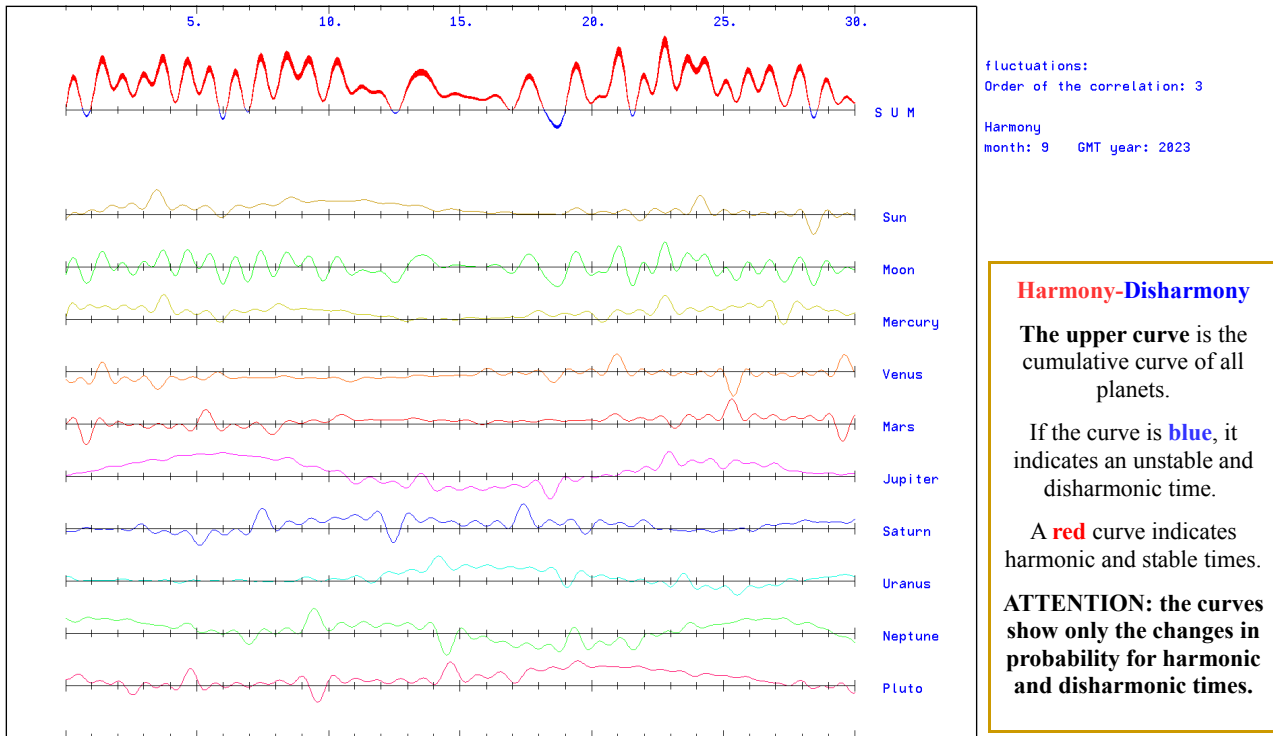

Figure 1; The quality of time in September 2023; full moon is on the 29st, new moon on the 15th.

Will September be a wave of success? The question is then only: success in which area?

In the first third Sun, Mercury, Jupiter and also Neptune are harmonious. It is vacation time. The astrological archetypal principles are brought here once again. Try to find out which time is favorable for you, with this harmony almost nothing can go wrong. Look below at the framework of the "Astrological Primal Principles". Do you need <ability to do work; drive; energetics; momentum; energy; will; courage to start anew;> , then look at the curve of Mars, in which time space it is harmonious. The curve should be above the middle line.

Also look at the curves of the other planets, maybe they inhibit or promote their activities.

Do not want <resistance; inhibition; stagnation;> in their undertakings, then look at the curves of Saturn, it should not be below the line in the disharmonic area .

The energy to the primordial principles can be found in the figure below.

Astrological Primordial Principles

Energy (astrologically assigned to **Mars**)

Ability to do work; drive; energetics; momentum; aggression; Energy; Will; Courage to start anew; Anger, spontaneity, strife;

Harmony (astrologically assigned to **Venus**)

pleasant agreement of the parts of a whole; stability; beauty; love; aesthetics; Convenience; slovenliness; overindulgence;

Information (astrologically assigned to **Mercury**).

Exchange of messages in coupled systems; communication; thinking; inquisitiveness; language; lack of concentration; superficiality;

Emotion (astrologically assigned to the **Moon**)

Emotional movement; excitement; unconscious; longing; moodiness; depressed mood;

Egocentrism (astrologically assigned to the **Sun**)

Center forming; central force; centralism; individualization; strength; ego force; arrogance; egoism; pride; vanity;

Transformation (astrologically assigned to the asteroid belt and alternatively to **Pluto**)

Die and become; transformation; regeneration; upheavals; letting go; Tensions; tearing energy; destructivity;

Growth (astrologically assigned to **Jupiter**).

Increase; expansion; multiplication; seeking dominion; Development; expansion; immoderation; loss of control;

Concentration (astrologically assigned to **Saturn**)

gathering; crowding together; concentrating; solidifying; striving for stable order; Resistance; inhibition; stagnation;

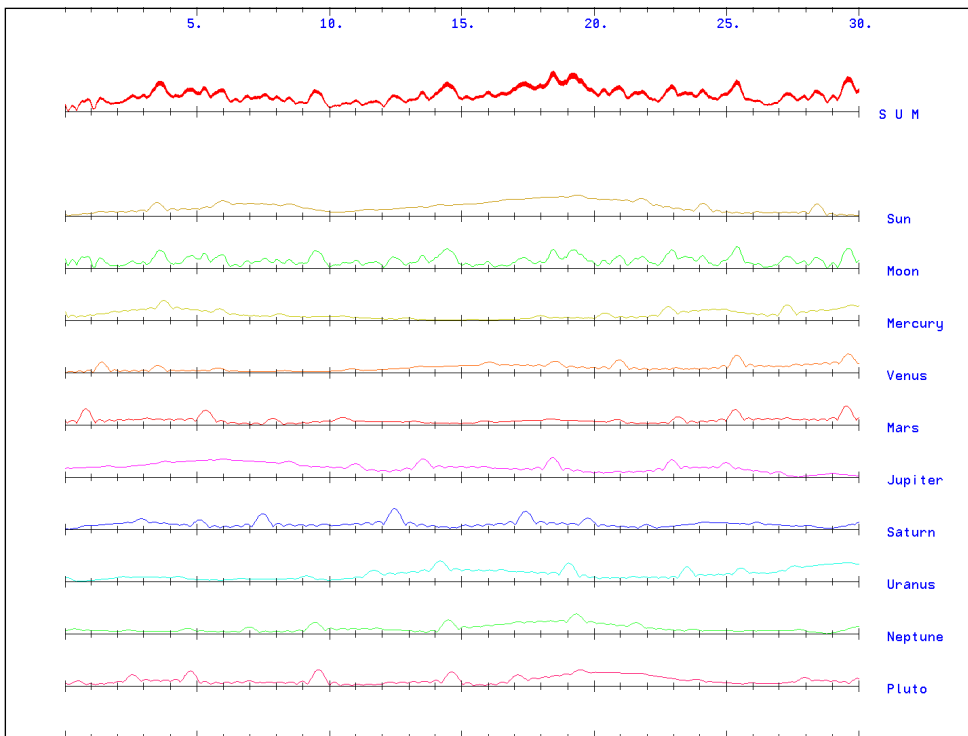

Spontaneity (astrologically assigned to **Uranus**)

sudden change; flash of thought; dissolution of ossified structures; originality; transformation of all values; eccentricity; chaos;

Reconciliation (astrologically assigned to **Neptune**).

Homogenization; reconciliation; selflessness; altruism; Inspiration; deception; disappointment; illusions; addictions;

ATTENTION: These are astrological empirical values which have not yet (to our knowledge) been examined according to scientific criteria. Therefore, they can only be used as a guide for the evaluation of harmony (red) and disharmony (blue) of the planetary curves.

Energy

The upper curve is the cumulative curve of all planets.

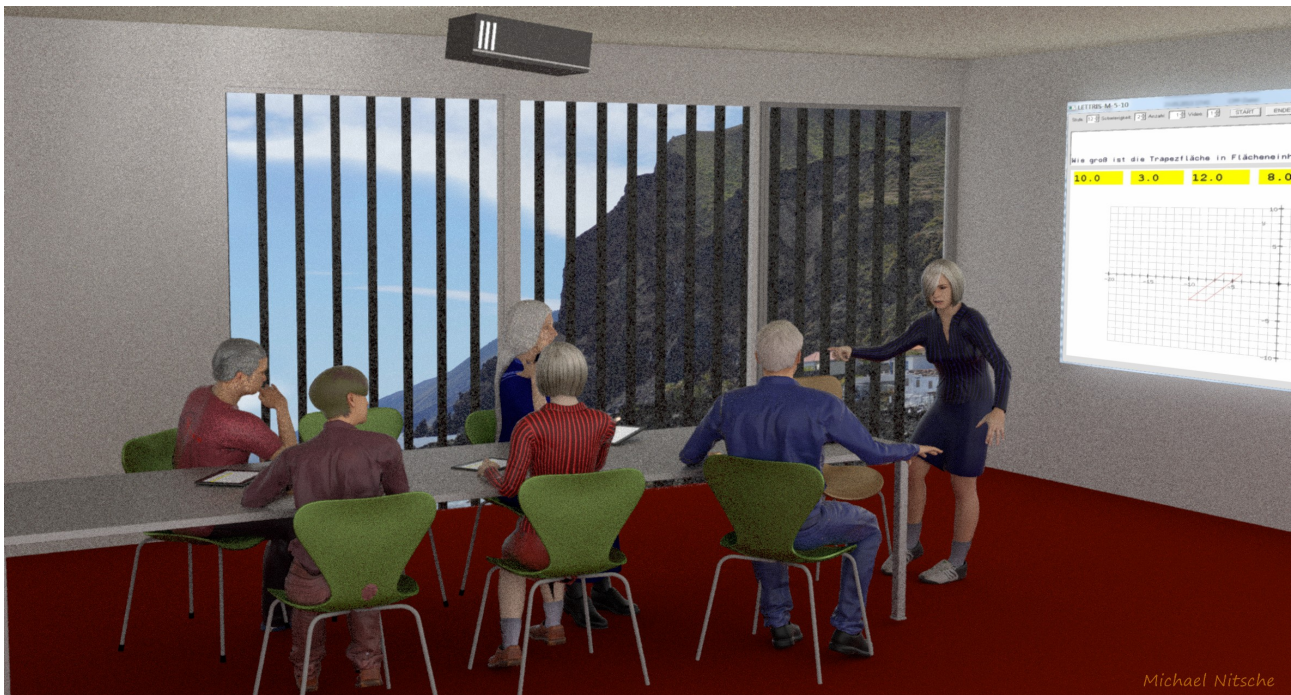

The distance of the curve from the black line indicates the strength of the energy.

It is a measure of the energy of harmonic and disharmonic states.

ATTENTION: the curves show only the changes in the probability for the energy.

Figure 2: The energy of the quality of time in September 2023

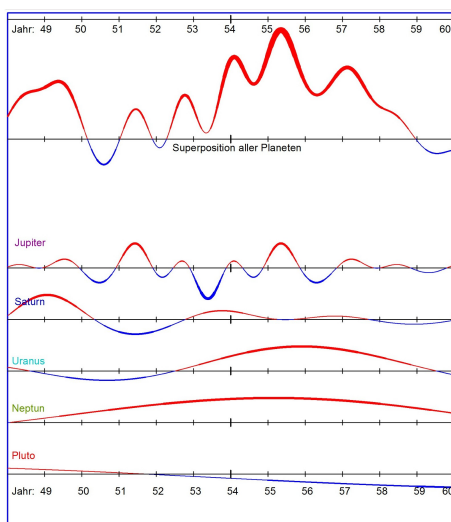

Biographical rhythms from the 48nd to the 60th year

For most people, the upheaval phase is now over and a period of consolidation follows. The personality is more secure, often more at peace with itself. With the end of 40, beginning of 50 begins for many a good, harmonious time. It is a phase of 1st spiritual maturation. Jupiter plays the background music.

The "Best" Years

At this age, a person has already accumulated a lot of life experience, a lot of wisdom about life, and often radiates security and serenity. The 50th birthday is celebrated by many as something special. In retrospect, these years are often perceived as "the best age". The greater mental horizon allows for new projects and goals, which are also directed toward effects on society as a whole.

At this age, a person has already accumulated a lot of life experience, a lot of wisdom about life, and often radiates security and serenity. The 50th birthday is celebrated by many as something special. In retrospect, these years are often perceived as "the best age". The greater mental horizon allows for new projects and goals, which are also directed toward effects on society as a whole. In addition to external successes and the beginning harvesting of life's fruits, the view of inner development becomes more essential. Increasingly, one's own values come to the fore, the overview of one's own life gives more mental freedom.

Figure 3: Biographic rhythms from 48 to 60

Quite a few feel the desire to pass on life's fruits to younger people. It also speaks for wisdom to support the younger ones in the profession who follow, instead of putting oneself in a (in the long run hopeless) competitive situation.

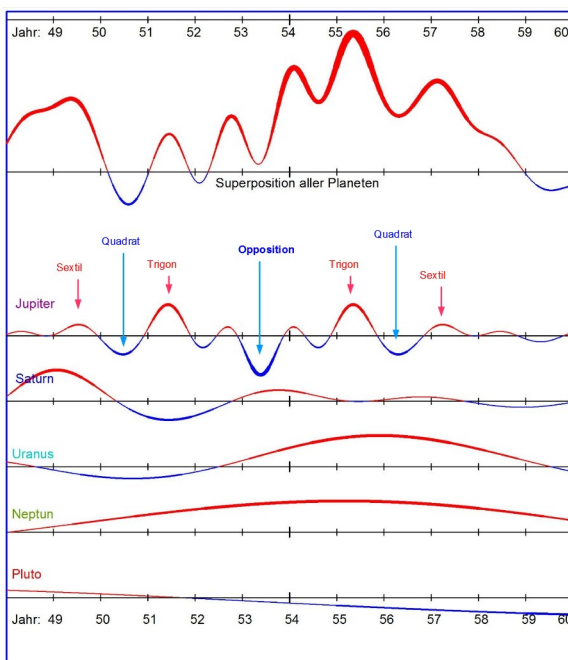

The cumulative curve is predominantly harmonic and in the active range. The focus is turned to the world until the end of 50.

The "growing rings", of which the barely 24-year-old Rainer Maria Rilke spoke, become more extensive. It is visible at the curves of the planets, they have larger deflections, the amplitudes become stronger.

Jupiter begins the 5th orbit through the natal chart. The values and the views of life can once again change significantly. Since Jupiter is also a synonym for wisdom in life, learning, the collection of knowledge will continue to play a role, but certainly more selective, more goal-oriented for many people. One can now also speak of "wisdom-related learning". The search for life satisfaction and happiness are gaining in importance.

The age of 50 is the age of Roman senators. Only from the age of 50 was the personality, according to Roman views, wise enough for the affairs of government.

Overview of the main transits of Jupiter to itself (autocorrelations) at the 5th orbit

Transits at the 5th orbit of Jupiter	Age in years	Remarks (astrological)
Conjunctions	48 years and 60 years	-Each beginning and conclusion of a period of unfoldment
Sextiles	50 years and 58 years	-favor and relief in life -New possibilities open up -life feels lighter -often an inconspicuous course
Squares	51 years and 57 years	-problems -difficulties and resistances -burdens
Trines	52 years and 56 years	-New possibilities -Unexpected opportunities -New doors open
Quincunxes	53 years and 55 years	-Harmonies and disharmonies change
Oppositions	54 Jahre 54 years	-Inhibitions and stagnation Problems and resistances -Turnarounds and new beginnings

Interpretation of the general rhythms for the age of 48 to 60 years

At the beginning of this 5th 12-year phase, the planets are in harmony. Jupiter is in sextile to the natal position at 49. Times when Jupiter is harmonious favor inner and also outer growth and activities that bring joy and success. Creativity becomes stronger. Man can free himself from

disturbing expectations.

Saturn is in trine to the natal position at 49/50 and has a stabilizing effect.

At the age of 51, the curves of Jupiter and Saturn enter the disharmonious area again, Jupiter and Saturn enter a square to each other. Intemperance (Jupiter) and lack of rhythm as well as lack of control over one's own inadequacies (Saturn) can lead into health or emotional difficulties. The curve of Uranus runs into disharmony for the next 3 1/2 years and may indicate difficulties in spontaneous reactions.

Everything that has not yet been given up in terms of old, outdated ideas should be thrown overboard now at the latest, so that life becomes freer for the spiritual maturation that is now necessary. A compulsive clinging to the old can lead to mental or sometimes also physical illnesses, which force a concentration and a reduction on spiritual things if necessary.

Saturn indicates harmony from about 53 to 57, forming a sextile to the natal position at about 54 / 55. This gives opportunities to take up more difficult issues and bring them to a good end.

However, around the age of 54 /55 there may be problems to the meaning of life, the curve of Jupiter is disharmonious, Jupiter is in opposition to the natal position for the 5th time.

During this time the curve of Neptune, the principle of reconciliation, is in the harmonic range and reaches a trine to the natal position at about 54 / 55. Life becomes freer from the illusions of the earlier years. New ideals emerge, which may be directed towards oneself, but may also have a spiritual, social or societal character. If the ideals remain more directed toward the outer life, they may acquire a tendency toward a reconciling all - love, toward an incipient old age mildness. Harmonic Neptune can also indicate a longing for spiritual backgrounds of life, or a subtle desire for a new creativity.

From 54 Uranus, the principle of spontaneity, is ascending and reaches a harmonic climax around 55/ 56. Uranus is again in trine to itself at 56. If these years are used to think about reorientations in inner freedom, a significant turning point in life can now be reached once again, which can bring a complete reorientation. This is a great opportunity. Personalities who once again take up new life themes at this age will live through the next years more easily and more meaningfully than those who hold on to the familiar or try to.

The curve of Pluto, the primordial principle of "die and become", of transformation, is descending from the beginning of 50. The view of life should change now at the latest. It is also the age from which serious illnesses, including deaths already become more frequent. The heart - circulatory system reacts particularly susceptibly. This can be a call to pay more attention to the body, habits and mental attitudes, to live healthier, to bring body, soul and spirit into a new harmony. The wisdom of the body should be heard more. Questions of fate intrude, sometimes also the contact with death. Some companions die.

The feeling that age is "already riding along in the back seat" can come up more and more often. But age can't take the wheel yet.

From the mid-50s Saturn gradually takes over the background music. Saturn stands for structure and order, for rhythm, responsibility and maturity. He is considered the "god of time" and is also associated with age, suffering and death. It is the age at which man now recognizes at the latest that from now on "not everything will be possible".

Serious illnesses are life crises and thus a violent incision in the path of life, which is sometimes totally changed by them. They put us on a different, new path, which is part of fate and sometimes brings very unexpected opportunities that the personality would not have taken "voluntarily", i.e. on its own, on its own initiative.

For the understanding of the curves I would like to remind here again that the planetary curves are very meaningful in the early childhood still in the physical area, but are already decoupled in the youth age from the physical development. The planetary curves give information about the mental - spiritual development possibilities of the human being, about chances and crises in the development.

Illnesses or death are not shown in the curves. However, since illnesses and also deaths become more frequent beyond the age of 50, it can be seen from the curves of the planets how one can deal with such strokes of fate and which themes belonging to the corresponding planets can be helpful.

The superimposition curve gains the strong harmony up to the age of 57 especially from the primordial principles of Uranus (spontaneity, change), Neptune (reconciliation, inspiration) and Saturn (concentration on essentials). This is an indication that significant new opportunities may emerge and be seized. Since the mental horizon has often broadened greatly at this age, interest in social and societal issues increases. Those who remain healthy at this time have once again greater chances of seizing something that corresponds to their own spiritual meaning of life and their individual spiritual home. These are very pleasant years in many biographies. Fruits of life are there, life struggles have mostly diminished. Priorities in life are in upheaval.

At the end of 58 to 60 years the curve of Saturn becomes disharmonious. Saturn comes the 2nd time in the life to the position of his birth and has completed again a great destiny orbit. This ends a great circle of life. The rhythm of Saturn is a rhythm of maturity, "the growing rings" have an even stronger rash. A significant stage of life has been reached. For some, the feeling arises that they have to give an account of the last thirty years. How one feels this upheaval depends on how the last 30 years have been lived. Not in every biography there are difficulties now. Those who have lived according to the previous rhythms, consciously or intuitively, will hardly feel that they have missed out on anything. But who has lived in the previous years externally determined or too strongly directed to the outside, will now feel challenged to think about the further years. What has been missed so far, which belongs to another stage of life, can rarely be made up for adequately.

The role of the birth chart

The analysis of the birth chart has the task to lead to self-knowledge. Only then can one work on one's own weaknesses and use the strengths brought along in a targeted way. It makes sense to look at the birth chart again and again in the different phases of life. The spiritual horizon has become wider in each case, new insights about oneself can be expected.

The principle of Saturn can help to achieve more clarity and depth about one's own life. The external view should now be clearly changed to an internal view. The fateful background of one's biography can become recognizable or can be guessed.

Life is lived forward, "im Gehen Leben," as Goethe wrote, but the understanding of it and the explanations are found in retrospect. At about age 60, individuation should have largely occurred. Around the 60th birthday, which is often felt as drastic, the conscience comes forward more strongly and forces an account of life.

The Swiss poet Conrad Ferdinand Meyer published his poem "Under the Stars" at the age of 58. It hits the Saturn theme very succinctly: Man comes to an age when he is confronted with the fruits

and consequences of his life.

Once again, it is time to review the luggage of life. Ballast should be thrown off, what is still worth preserving must be rearranged and adapted to age. The principle of Saturn leads to reduction, to the simple and manageable.

Concentration on our own being becomes more important. Saturn leads to ourselves. This path is often a lonely one.

The quality of time at the birth of a human being in September 2023

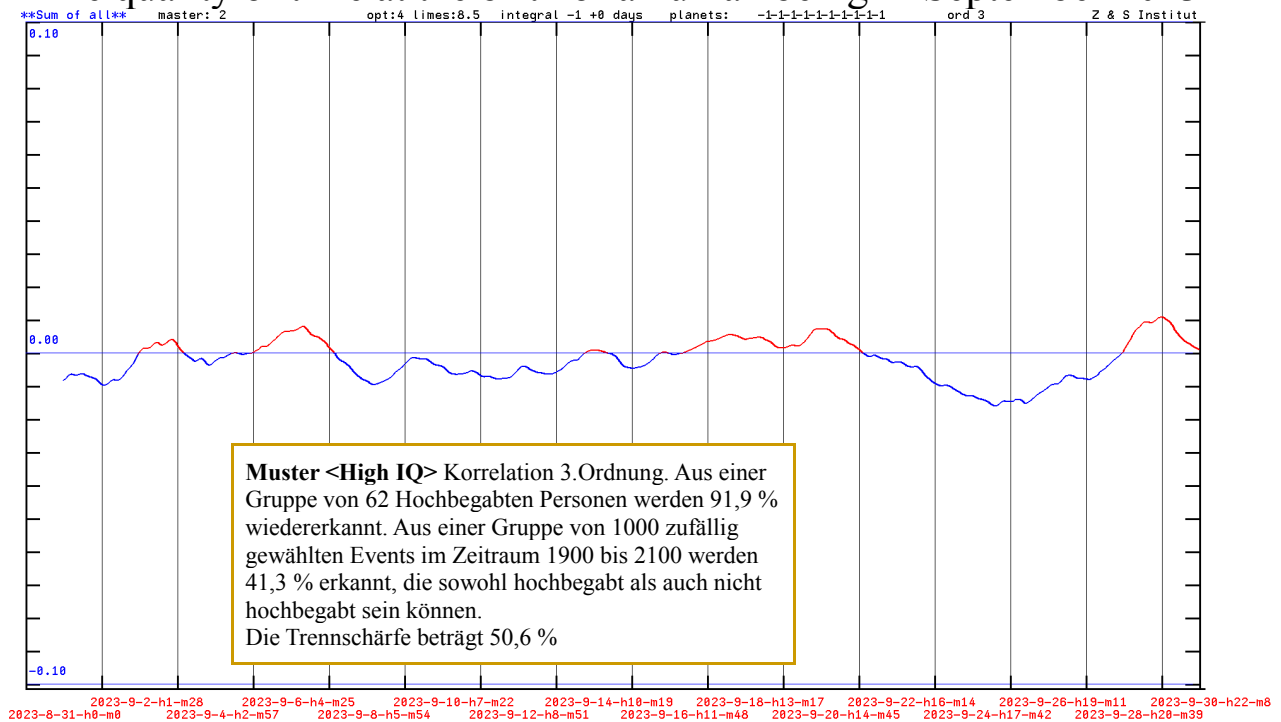

Figure 4: The probability of a higher IQ when a person is born in September 2023. If the curve is above the midline, then this time falls into the "High IQ" pattern for the highly gifted..

Important: During the whole period children are born with a high and a low intelligence quotient. The curves only indicate the changes in probability.

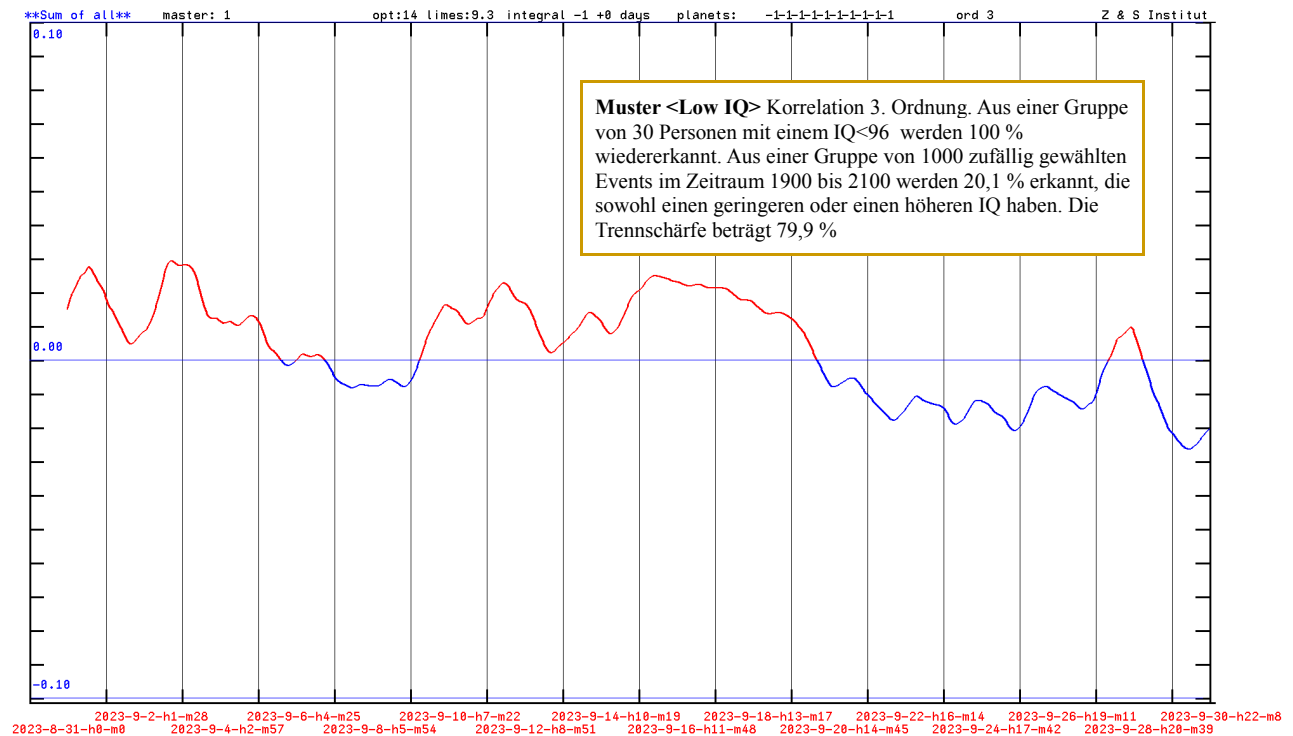

Figure 5: The probability of low IQ when a person is born in July 2023. If the curve is above the midline, then this time falls within the pattern for low IQ.

Can these curves also be used for the start (birth) of projects?

There is no research on this yet. But it could be a hypothesis.

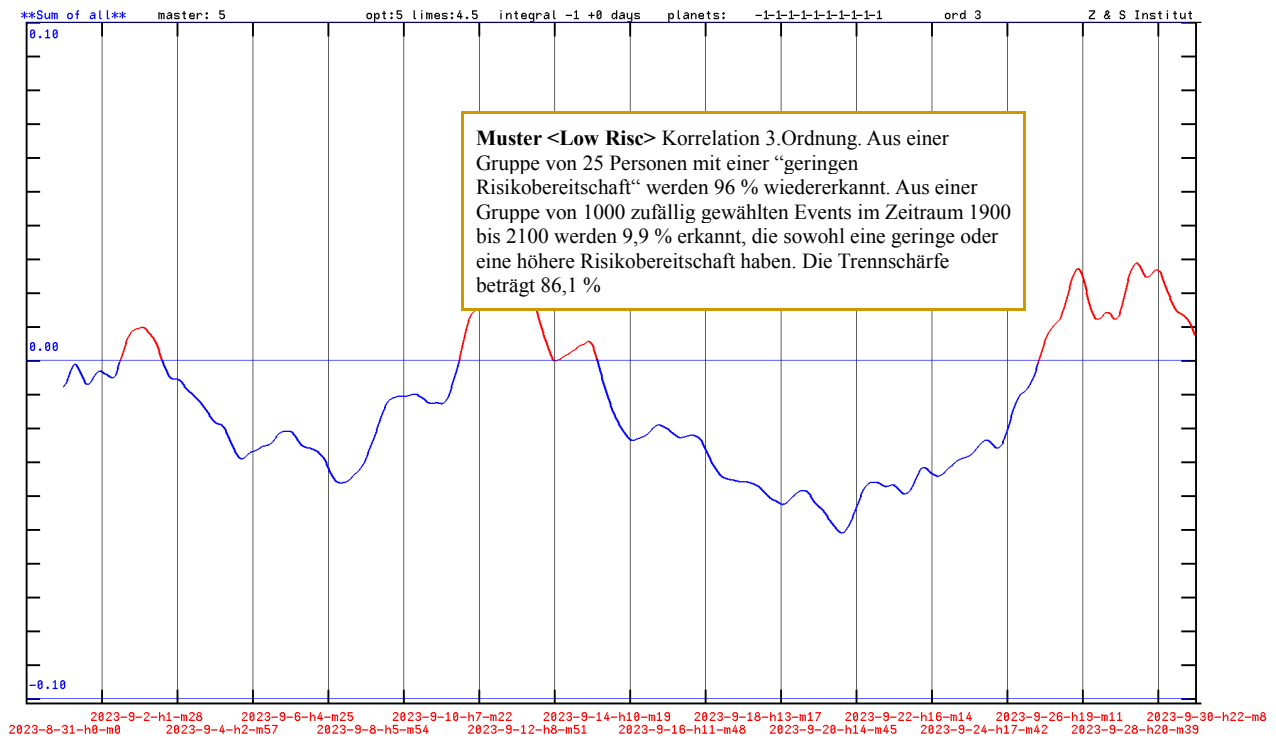

Figure 6: The probability for the characteristic "low risk-taking/strong need for harmony" when a person is born in August 2023. If the curve is above the center line, then this time falls into the pattern for a "low risk-taking/strong need for harmony".

Even these few, statistically validated research studies indicate that there is still a large field for further investigation. For this purpose, groups of people with the same character traits must be studied. If such groups show significant deviations from the continuum (average), patterns can be created for prognostics.

To the interested readers: If you know such groups of people with special, statistically secured character traits, you can send them to us for testing for significance. If it is a trait that deviates from the average, we can create a sample.

Artificial intelligence in the forecasting of earthquakes in September 2023.

The fluctuating planetary gravitational field influences not only activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly chosen control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

Mattern A

Group of the 41 strongest earthquakes of the last century (1900-2000).

The pattern used here finds 100% from the list of 41 strongest earthquakes. However, 25.8% of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) from the continuum is 74.2 .

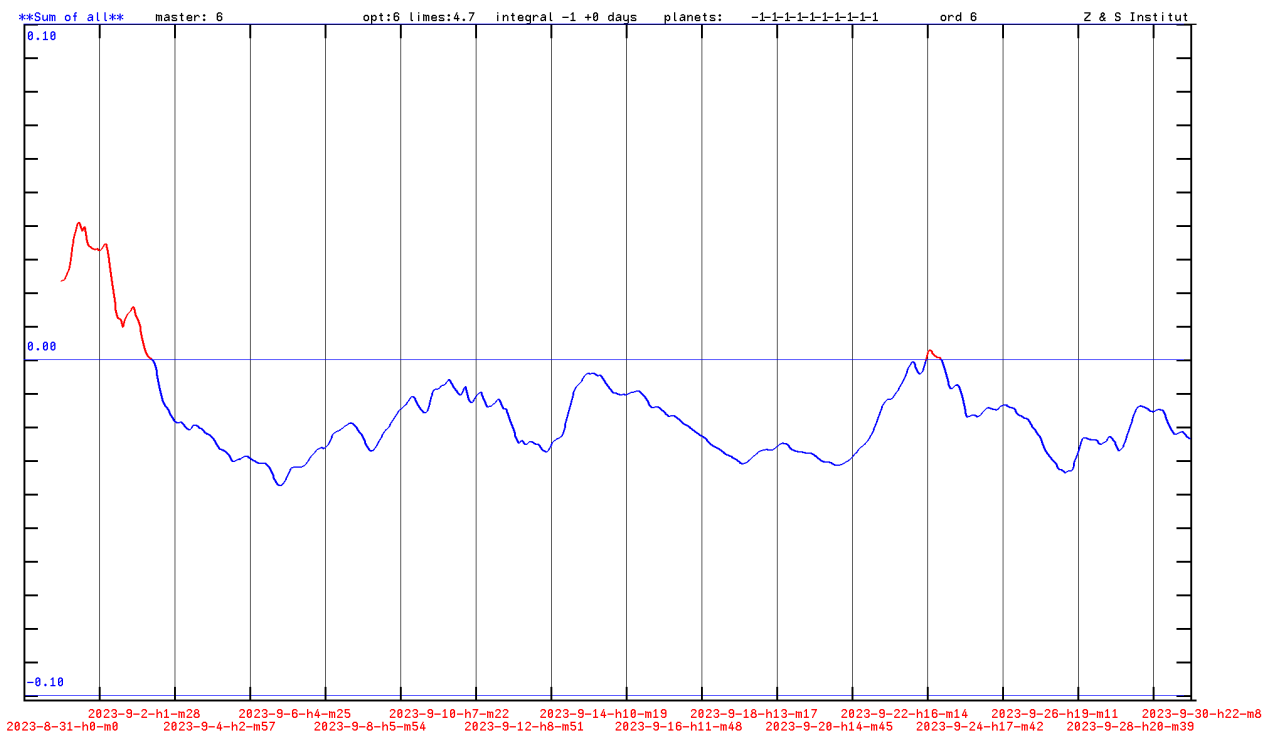

Figure 7: Curve of pattern A for the period 2023-8. Above the center line, the probability of a pattern A earthquake is greater.

Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or those that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena.) in the time period 1997-01-05 to 2002-06-18].

82% from the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a time period from 1900 to 2100.

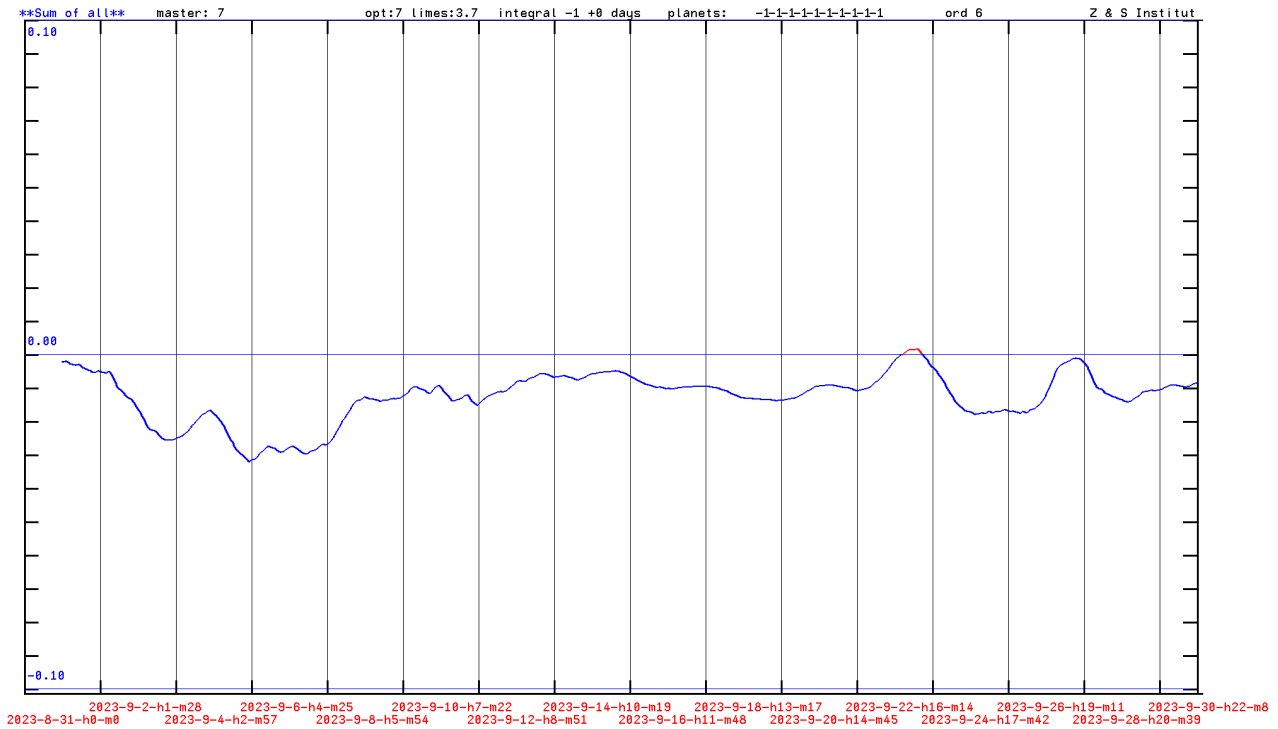

Figure 8: Curve of pattern B. 513 earthquakes for the period 2023-7. Above the center line, the probability of a pattern A earthquake is greater.

Important: This does not exclude major earthquakes.

Pluto at Albert Einstein's birth

(This article is a correction of the first published article "The Mystery of Albert Einstein's Birth". Incorrectly, Einstein's birth was calculated as 1879-03-16).

Let us first look at the time quality of his birth:

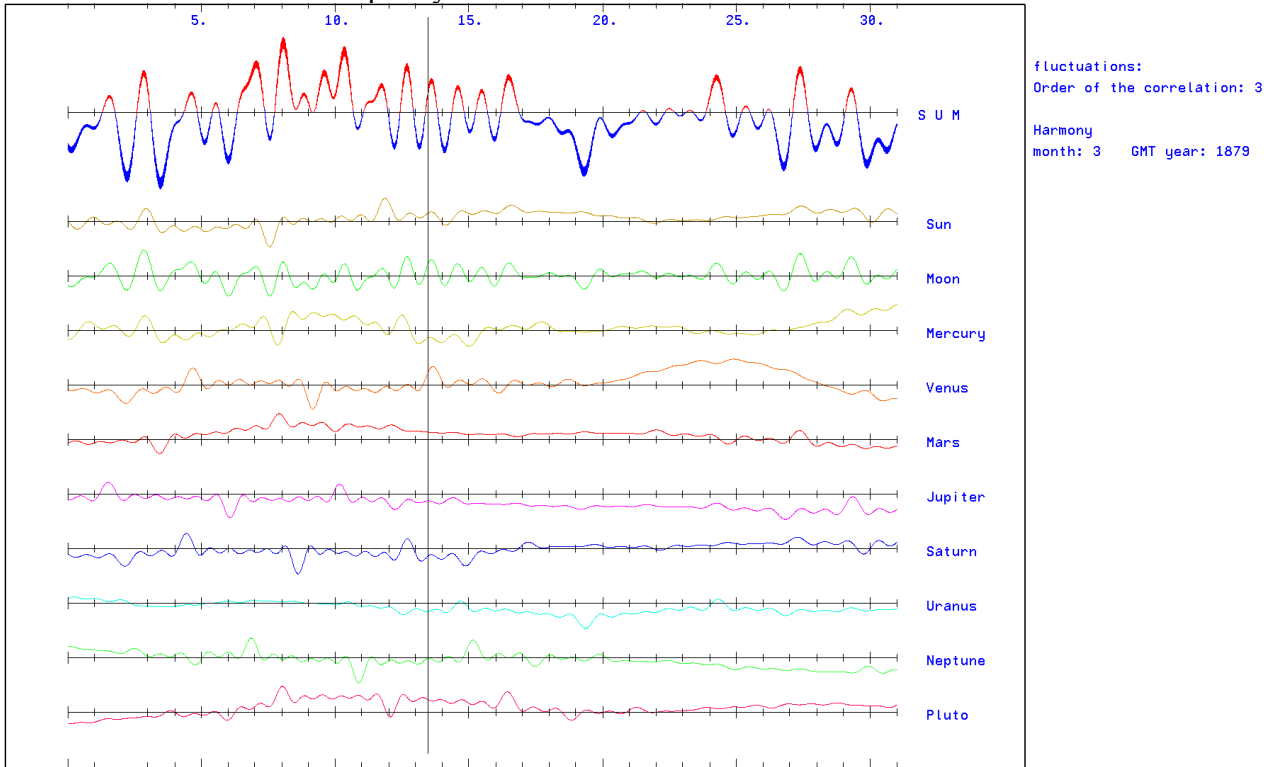

Figure 9: The harmony of time quality 1879-03 (Einstein's birth month). The vertical line marks the time of birth of Albert Einstein.

Statistics 4: Probability of events: correlation matrix H

Pluto (lower row of the matrix) is conspicuous.

Sun	Moon	Mercury	Venus	Mars	Jupiter	Saturn	Uranus	Neptune	SUM
4.89	47.19	64.94	53.77	2.62	94.15	57.92	10.74	42.43	12.66

Table 2; Probabilities of the Pluto harmonic of Albert Einstein.

3 significant correlations (Moon-Venus, Sun-Pluto, Mars-Pluto) out of 48 are quite to be expected. However, 2 of them refer only to Pluto. This occurs in 7% of all cases.

Pluto is the largest and second most massive known dwarf planet in the solar system and the longest known object in the Kuiper belt. It moves in an even more eccentric orbit around the Sun than the planet Mercury. Its volume is about one-third that of Earth's moon." (Wikipedia)

Pluto's gravitational pull is extremely weak, equivalent to the gravitational pull of a lead ball weighing 50 grams and about 2 cm in diameter at a distance of 10 meters.

Because of these small physical quantities one is always inclined to regard Pluto as marginal and not to grant it any influence. One is all the more astonished when its influence cannot be eliminated in statistical investigations, as the example of Einstein's birth shows.

Now the question immediately arises: Is this just a special position of Einstein's birth time?

For comparison, following a list from Wikipedia, another 16 physicists who had worked on quantum theory were examined. These are:

- Max Planck 23. 4. 1858 Kiel
- Arnold Sommerfeld 5.12. 1868 Königsberg
- Albert Einstein 14. 3. 1879 Ulm
- Ernest Rutherford 30. 8. 1871 Spring Grove
- Max Born 11 12. 1882 Breslau
- James Franck 26. 8. 1882 Hamburg
- Niels Bohr 7. 10. 1885 Kopenhagen
- Erwin Schrödinger 12. 8. 1887 Wien
- Wolfgang Pauli 25. 4. 1900 Wien
- Werner Heisenberg 5.12. 1901 Würzburg
- Enrico Fermi 29. 9. 1901 Rom
- Paul Dirac 8. 8. 1902 Bristol
- Pascual Jordan 18. 10. 1902 Hannover
- Lew Landau 22. 1. 1908 Baku
- John Archibald Wheeler 9. 7. 1911 Florida
- Richard Feynman 11. 5. 1918 Queens, New York
- Julian Schwinger 12. 2. 1918 New York City

Sun	Moon	Mercury	Venus	Mars	Jupiter	Saturn	Uranus	Neptune	SUMME
25.94	0.47	64.75	71.17	27.27	36.54	87.83	99.63	72.54	63.36

Table 2; Probability of Pluto harmony from 17 quantum physicists in the above list.

For the control here even 100 000 control groups were calculated to 17 events each.

This is still remarkable insofar, because, except for Einstein, for the 16 quantum physicists the exact birth time was not available and therefore the time quality was calculated for 12 o'clock.

The error probability for the 0.47% (correlation Pluto-Moon) is 4%. The correlation Pluto-Uranus (99.63) is extremely disharmonious with an error probability of 3%.

Sun	Moon	Mercury	Venus	Mars	Jupiter	Saturn	Uranus	Neptune	SUMME
80.29	2.03	83.14	62.31	45.60	73.30	90.69	0,04	99.95	40.35

Table 3; Probability of Pluto energy from 17 quantum physicists in the above list.

Even more characteristic than harmony is the energy of quantum physicists.

Sun	Moon	Mercury	Venus	Mars	Jupiter	Saturn	Uranus	Neptune	SUMME
10.37	93.71	70.74	92.95	4.33	11.58	86.85	22.34	71.88	29.13

Table 4; Probability of Pluto energy for the birth of Albert Einstein.

Einstein is included in the list, but does not correspond to the superpositions of all quantum physicists.

For the examined quantum physicists the correlations of Pluto are a unique feature, which is not physically so comprehensible.

For the group of the 17 examined quantum physicists can be said first:

1. the harmony between Moon and Pluto is highly significant (0.47%).
2. energy of correlation between Moon and Pluto is significant (2,03%).
3. the disharmony of Pluto and Uranus is significantly high (99.63%).
4. the energy of the correlation of Pluto with Uranus is significantly high (0.04%).
5. extremely low energy of disharmonious Neptune (99,63%) is unusually high significant (99,95%) (significant are the border areas <5% and >95%)

If a pattern (artificial intelligence) is now created from all 17 quantum physicists, the following result is obtained after several cycles:

Computer expression:

numberopt: -13- optimization master: 13 ORD: 3 group: 17 group percent: 88.2 compare group: 1000 percent: 1.9 difference: 86.3

The pattern recognizes 15 persons from the list of 17 quantum physicists (88.2 %) and from a random list of 1000 events 1.9 % in the period 1800 - 2100. The difference of 86.3 % is the criterion for the optimization.

Two physicists from the list of 17 quantum physicists are not recognized. It can be assumed that they do not correspond to the characteristics of the 15 others, because the optimization program cannot recognize them.

Which two physicists are they?

The Mystery of Pluto

(Continuation of "Pluto at Albert Einstein's Birth")

Summary of the results of the contribution from 2023-08:

A pattern of 17 quantum physicists was optimized. This AI pattern recognizes 15 people from the list and two do not, which is 88.2%. From a list of 1000 random events, 1.9% are recognized as "quantum physicists", which is 19. The difference of 86.3% is the optimization criterion

If these two people are removed from the list and a new AI pattern is created and optimized from these 15 people, all 15 quantum physicists are detected (100%) and from the list of randomly chosen events, 1.5% are detected as "quantum physicists", which is 15. The difference is 98.5%. The events for comparison were chosen in the period 1800 to 2100. It is not to be expected that actually the 15 quantum physicists were chosen randomly. The birth period of the quantum physicists is from 1858 to 1918.

If the month in which a quantum physicist was born is scanned, the curves look like this:

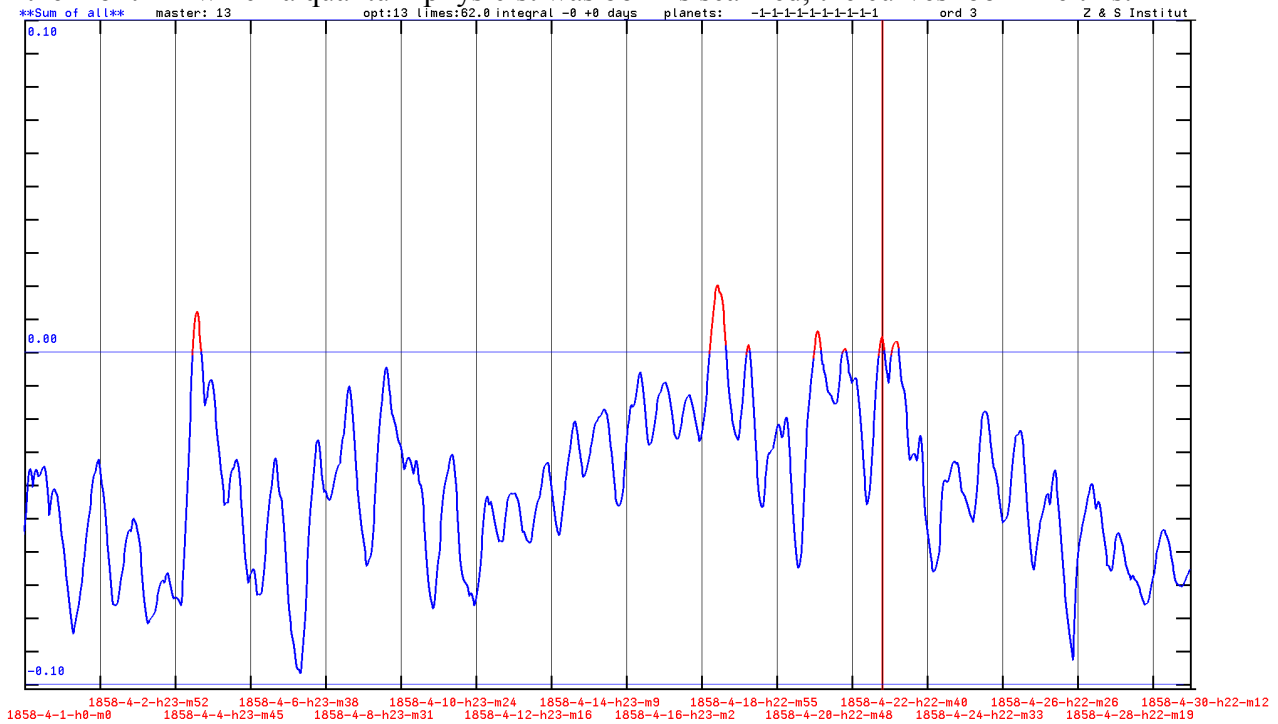

Figure 10: birth month of Max Planck, evaluated by AI pattern <quantum physicist-15>. There are few red areas where the AI pattern detects a quantum physicist. The vertical line is the birth time of Max Planck.

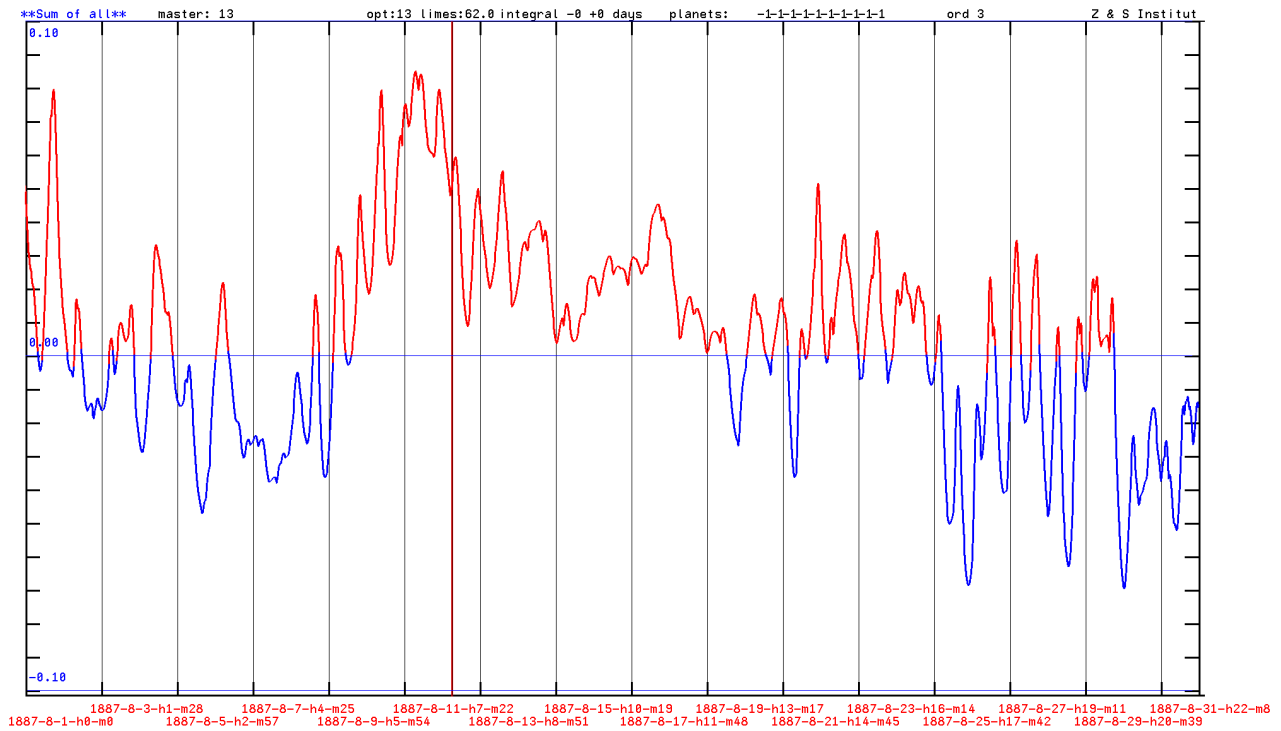

Figure 11: birth month of Erwin Schrödinger, evaluated by the AI pattern <quantum physicist-15>. There are many red areas where the AI pattern recognizes a quantum physicist. The vertical line is the birth time of Erwin Schrödinger.

The birth month of Erwin Schrödinger shows very large areas which the AI pattern shows as favorable birth times for quantum physicists. How does the time quality look to this?

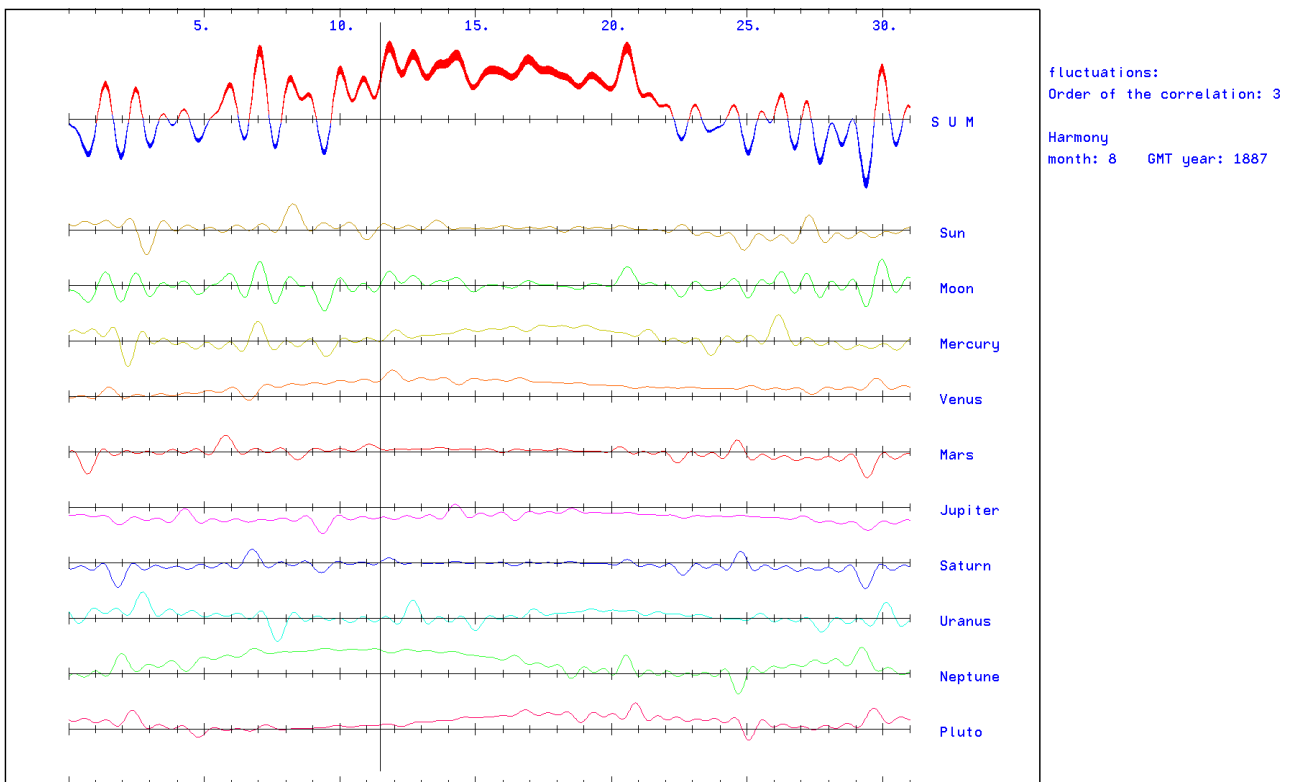

Figure 12: birth month of Erwin Schrödinger. The harmonies and disharmonies of the planets are shown as curves.

The comparison shows that for Erwin Schrödinger's birth Neptune and Venus go through a longer harmonic period. Pluto and Mercury also start a longer harmonic phase. From this one cannot deduce that in this time mainly quantum physicists are born. Of course the genes play a not negligible role.

Let us now look at the birth month of the two physicists who do not fall into the AI pattern of quantum physicists.

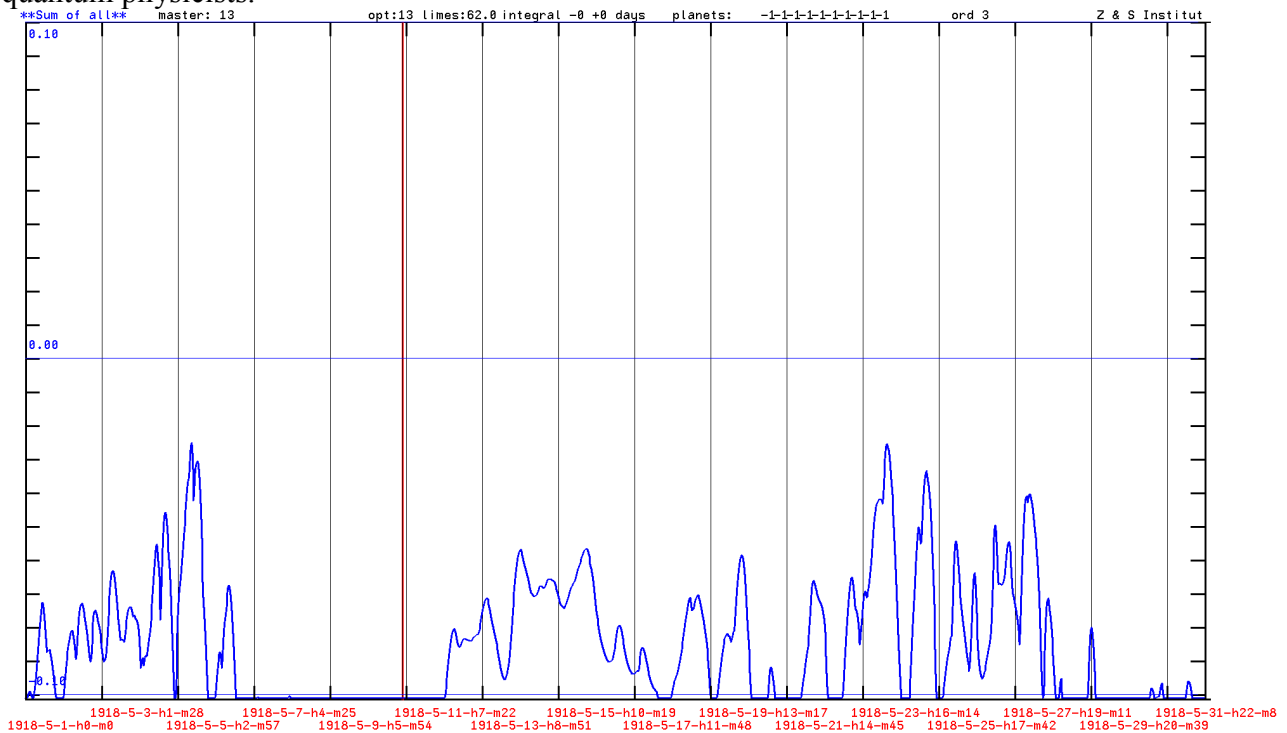

Figure 13: birth month of Richard Feynman, evaluated by AI pattern <quantum physicist-15>. There are no red areas where the AI pattern detects a quantum physicist. The vertical line is the time of birth of Richard Feynman.

Richard Feynman is not recognized.

"Feynman is considered one of the great physicists of the 20th century who made significant contributions to the understanding of quantum field theories. Together with Shin'ichir? Tomonaga and Julian Schwinger, he received the Nobel Prize in 1965 for his work on quantum electrodynamics (QED). His descriptive representation of quantum field theoretical elementary interactions by Feynman diagrams is now a de facto standard.[1]

For Feynman, it was always important to make the obscure laws of quantum physics accessible and understandable to laymen and students. At universities, his lecture series (The Feynman Lectures on Physics) is widely used. In books such as QED: The Strange Theory of Light and Matter[2] and Character of Physical Law, he addressed a wider audience. His charisma and ability to relate to his audience made his lectures and talks legendary. His unconventional and nonconformist nature was also evident in his autobiographical books..."(Wikipedia)

Feynman was obviously not the typical quantum physicist; he had other talents, including making difficult-to-understand theories more popular.

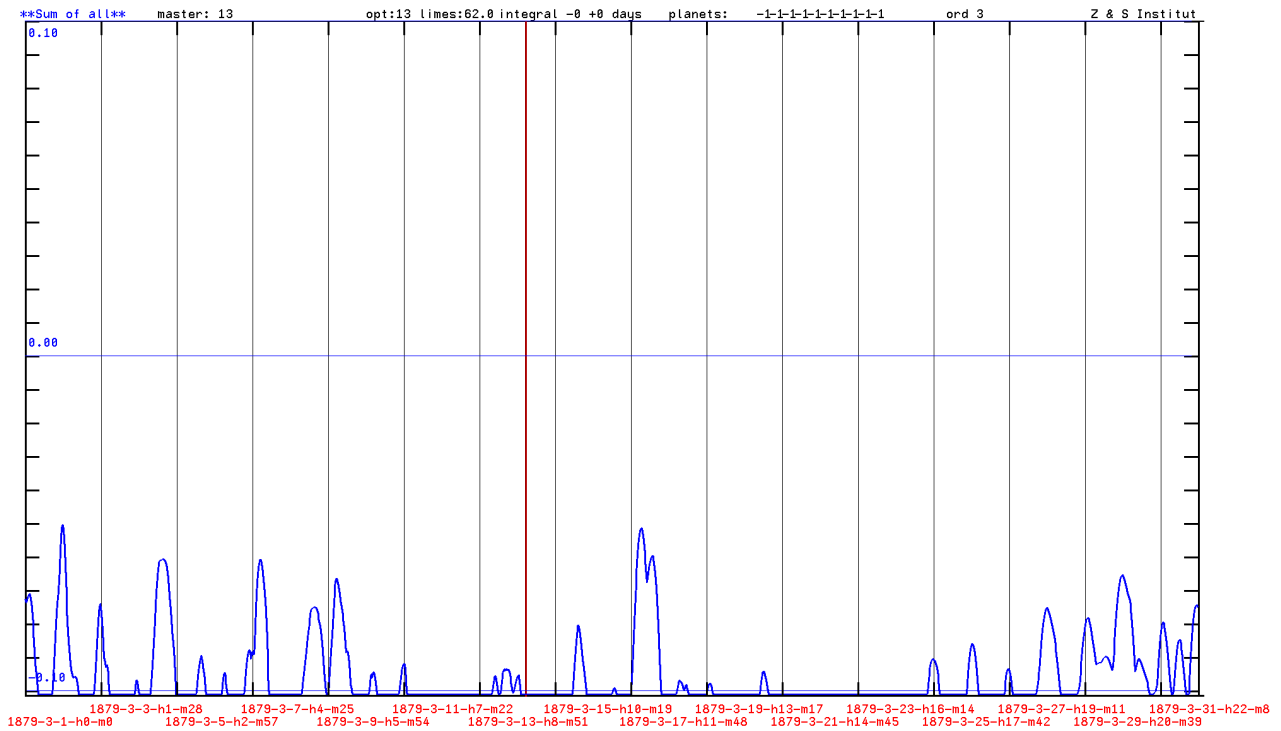

Figure 14: birth month of Albert Einstein, evaluated by AI pattern <quantum physicist-15>. There are no red areas where the AI pattern detects a quantum physicist. The vertical line is the time of birth of Albert Einstein.

Albert Einstein is not recognized.

"Einstein's relationship to another pillar of modern physics, quantum physics, is remarkable: on the one hand, because some of his work, such as the explanation of the photoelectric effect, formed its basis; on the other hand, because he later rejected many ideas and interpretations of quantum mechanics...Einstein believed that the random elements of quantum theory would later prove not to be truly random. This attitude led him, first in a dispute with Max Born, to make the famous statement that the Old Man (or Lord God) does not play dice:[117]

"Quantum mechanics is very respectful. But an inner voice tells me that this is not yet the true Jacob. The theory delivers a lot, but it hardly brings us closer to the secret of the old one. In any case, I am convinced that the old man does not play dice."

In discourse, however, Bohr and his followers remained mostly victorious; even from today's perspective, the experimental evidence argues against Einstein's point of view.... "(Wikipedia)

Einstein was not the typical quantum physicist; his physical talents were more focused on space and time.

Important: The investigations refer only to the quantum physicists listed above. To conclude from this to other quantum physicists can only be considered as a hypothesis. A mystery, which stimulates further investigations, is it in any case.

What does the pattern <quantum physicist-15> say for September 2023 ?

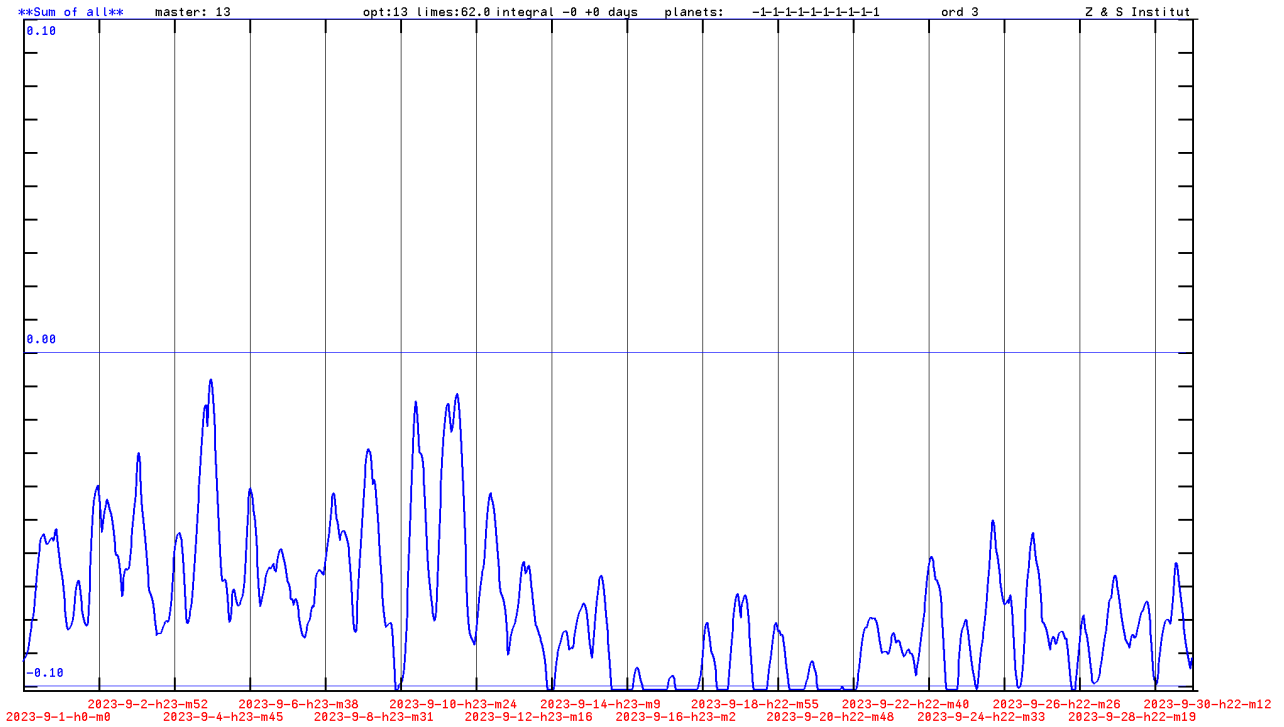

Figure 15: September 2023, evaluated by the AI pattern <quantum physicist-15>. There are no red areas where the AI pattern detects a favorable time for the birth of a typical pioneer of quantum physics.

Summary

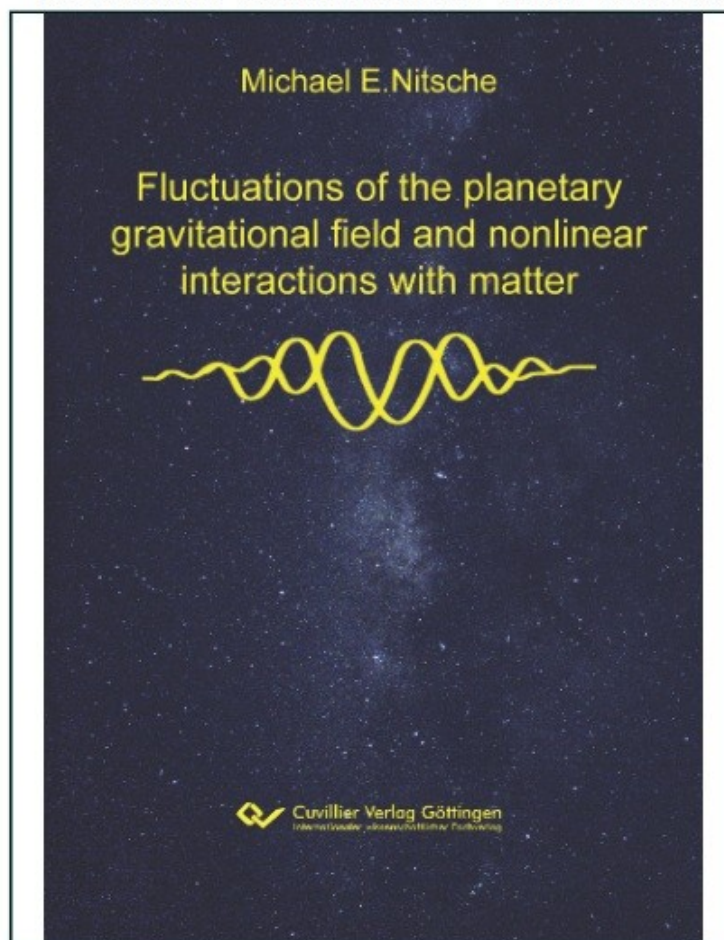

From the investigations it is clear that the harmonics of the planetary gravitational field cannot act only by gravity. It can be assumed that besides energy and matter, information plays an essential role. Thus, it is not Pluto's mass alone, but also its orbit that causes the complex interaction as an oscillator in the planetary system. Further investigations are necessary. The investigations so far even suggest that evolution gets another factor, planetary constellations, in addition to selection and mutation. This conjecture should be further investigated.

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

Guest posts

Do you have individuals, groups of individuals, special events or groups of events?

We will review you and, if suitable, conduct research and publish the results with you in our journal or in an international peer reviewed journal.

Your own research?

If you intend to conduct your own research independently of us, you can purchase the astro-basis program (manual here: <http://www.planetare-korrelation.eu/program-astro-2.htm>). With this program all research results were obtained, which were published in the international journals

Earth & Environmental Science Research & Reviews;

International Journal of Clinical & Medical Informatics;

Journal of Robotics and Automation Research;

Journal of High Energy Physics, Gravitation and Cosmology;

were published.

For further requirements you can also purchase the astro-extended program (manual here: <http://www.planetare-korrelation.eu/program-astro-extended.htm>). This program can among other things also carry out resonance examinations (transits) statistically secured.

Contact us, we will advise you!

Contract research for your personal questions

Do you need quality time for personal appointments, births, or groups of people?

We calculate the time quality matrices for you with statistical tests for significance.

For one appointment we will charge you 80,-€, for groups up to 30 events or persons 120,-€.

Sponsoring

Would you like to support our research financially?

Please get in touch with us. Your support can also refer to individual studies, for example. An internationally published research article can then include the addendum: "This research was conducted by *Your name or company*.... sponsored. In addition, your name or company can - if you wish - be published on our homepage with a link.

Contact us, we will advise you!
