The quality of time at the birth
of a human being in November
2023

The magazine "The Quality of Time" is now published one year. This is the occasion to point out here once again the essence of wave astrology. It is also a documentation of the development of wave astrology. Added this year is the application of the theory in the form of a first approach of an AI. The theory of wave astrology is based on the gravitational harmonics of the planetary great bodies Sun, Moon and planets. Apart from the sun, all move on nearly circular orbits. They represent thus classical oscillation formations, oscillators. The large bodies of the solar system affect each other constantly over the gravity. These oscillators are all coupled among themselves, so that the common center of gravity of the planetary system constantly changes within the sun and thus also affects the activity of the sun. But this constant change also affects the Earth. The resulting oscillation patterns are very complex and are taken into account in classical astrology approximately by the aspects (angles) under which they appear from the Earth. As research has shown, such a complex and non-linearly behaving system can only be fully grasped by an AI. The result is changes in probability over time for stable (harmonic) and unstable (disharmonic) states on Earth.

Harmony and disharmony in November 2023

Let's look at the harmony and disharmony in November 2023:

Figure 1; The quality of time in November 2023; full moon is on the 27st, new moon on the 13th.

Fig. 2. the misty woman spins the world; from a quartet of seasons

November is varied, with phases of instability and disharmony predominating. Evolution is always an alternation between stable and unstable periods. November is a melancholy month in the northern hemisphere, a gloomy month. The sun shines shorter, when it does, and the colorfulness of autumn disappears in a foggy gray. Please always note the energy of the individual planets. Please always note, the general time quality, as it is calculated in the curves, is also valid for the people of your environment.

Look below at the framework of the "Astrological Primal Principles". Do you need **<ability to do work; drive; energetics; momentum; energy; will; courage to start anew;>** , then look at the curve of Mars, in which time space it is harmonious. The curve should be above the middle line.

Also look at the curves of the other planets, maybe they inhibit or promote their activities.

Do not want **<resistance; inhibition; stagnation;>** in their undertakings, then look at the curves of Saturn, it should not be below the line in the disharmonic area .

The energy to the primordial principles can be found in the figure below.

Astrological Primordial Principles

Energy (astrologically assigned to **Mars**)

Ability to do work; drive; energetics; momentum; aggression; Energy; Will; Courage to start anew; Anger, spontaneity, strife;

Harmony (astrologically assigned to **Venus**)

pleasant agreement of the parts of a whole; stability; beauty; love; aesthetics; Convenience; slovenliness; overindulgence;

Information (astrologically assigned to **Mercury**).

Exchange of messages in coupled systems; communication; thinking; inquisitiveness; language; lack of concentration; superficiality;

Emotion (astrologically assigned to the **Moon**)

Emotional movement; excitement; unconscious; longing; moodiness; depressed mood;

Egocentrism (astrologically assigned to the **Sun**)

Center forming; central force; centralism; individualization; strength; ego force; arrogance; egoism; pride; vanity;

Transformation (astrologically assigned to the asteroid belt and alternatively to **Pluto**)

Die and become; transformation; regeneration; upheavals; letting go; Tensions; tearing energy; destructivity;

Growth (astrologically assigned to **Jupiter**).

Increase; expansion; multiplication; seeking dominion; Development; expansion; immoderation; loss of control;

Concentration (astrologically assigned to **Saturn**)

gathering; crowding together; concentrating; solidifying; striving for stable order; Resistance; inhibition; stagnation;

Spontaneity (astrologically assigned to **Uranus**)

sudden change; flash of thought; dissolution of ossified structures; originality; transformation of all values; eccentricity; chaos;

Reconciliation (astrologically assigned to **Neptune**).

Homogenization; reconciliation; selflessness; altruism; Inspiration; deception; disappointment; illusions; addictions;

ATTENTION: These are astrological empirical values which have not yet (to our knowledge) been examined according to scientific criteria. Therefore, they can only be used as a guide for the evaluation of harmony (red) and disharmony (blue) of the planetary curves.

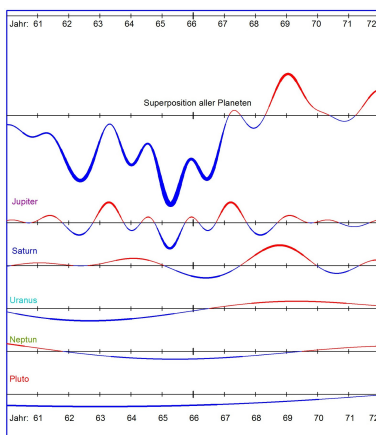

Figure 3: The energy of the quality of time in November 2023

Biographical rhythms from the 60nd to the 72th year

Interpretation of the general rhythms for the years from 60 to 72.

Looking at the superposition curve, you see a deep dip around 62 years, and then again around 65 to 67 years. At 66 / 67, Saturn is square to its natal position. These are challenges that come to every personality. Often inhibitions and resistances as well as fears of the coming years are felt. Old - becoming is individual, and depends very much on how one has lived up to now, which focal points were important in life.

Saturn shows up to 65 harmonies, is in sextile to itself, an indication that new tasks can be found. There are opportunities for spiritual growth, if you are open to them.

Fig. 4. Biographical rhythms from the 60th to the 72nd year.

Ideal for the completion of the personality would now be topics, which could not be taken up in the younger years or which had to step as talents in favor of the life mastering into the background. Jupiter points to still favorable possibilities in this phase of life. The curve of Uranus is disharmonious until the age of mid-60s. Changes and upheavals are indicated, which are often felt to be burdensome. For many, their previous occupation ends in their mid-60s. This means a strong, often crisis-like break in life.

Transition to old age

One can also speak of the transition crisis into retirement. For many people, the years from 63 to 67 are difficult, often marked by a farewell to the world of work, to the job they have held up to now. Younger colleagues have a better performance capacity. This can also be a psychological burden. For some time, the declining performance can be

compensated by the experience. But for most, it is impossible to ignore the fact that physical and mental strength is declining, often forcing a departure from the job or leading to illness that makes the usual work impossible, so that the employment relationship must be terminated. Letting go is often a difficult challenge. Jupiter is in opposition to itself, Saturn in square. The cumulative chart is clearly disharmonious.

Jupiter and Saturn are harmonious at the beginning of this phase of life.

"Only he remains alive
who is willing to let
go."
Carl Gustav Jung

You can use the momentum of the early years of this stage of life and already start thinking about "the time after", i.e. not clinging to the familiar, but looking for new opportunities for development, new tasks that have been neglected so far.

(to be continued)

The quality of time at the birth of a human being in November 2023

Figure 5: The probability of a higher IQ when a person is born in November 2023. If the curve is above the midline, then this time falls into the "High IQ" pattern for the highly gifted..

Important: During the whole period children are born with a high and a low intelligence quotient. The curves only indicate the changes in probability.

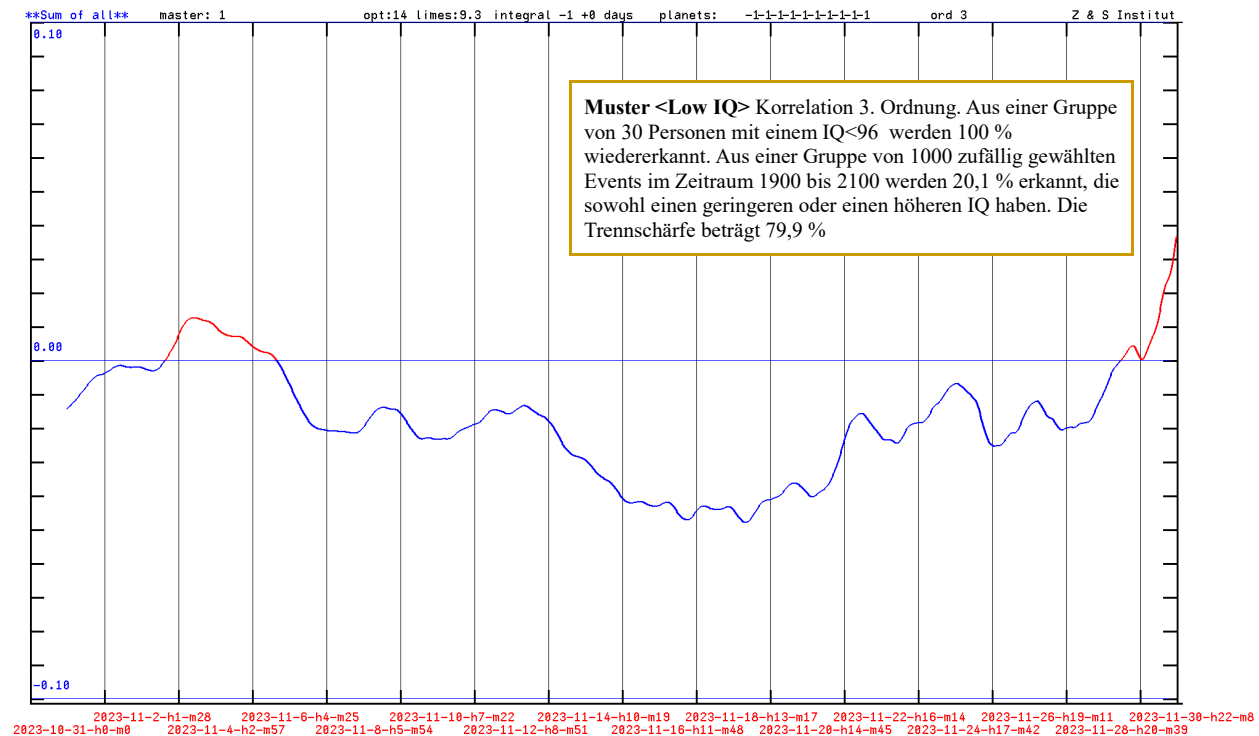

Figure 6: The probability of low IQ when a person is born in July 2023. If the curve is above the midline, then this time falls within the pattern for low IQ.

Can these curves also be used for the start (birth) of projects?
 There is no research on this yet. But it could be a hypothesis.

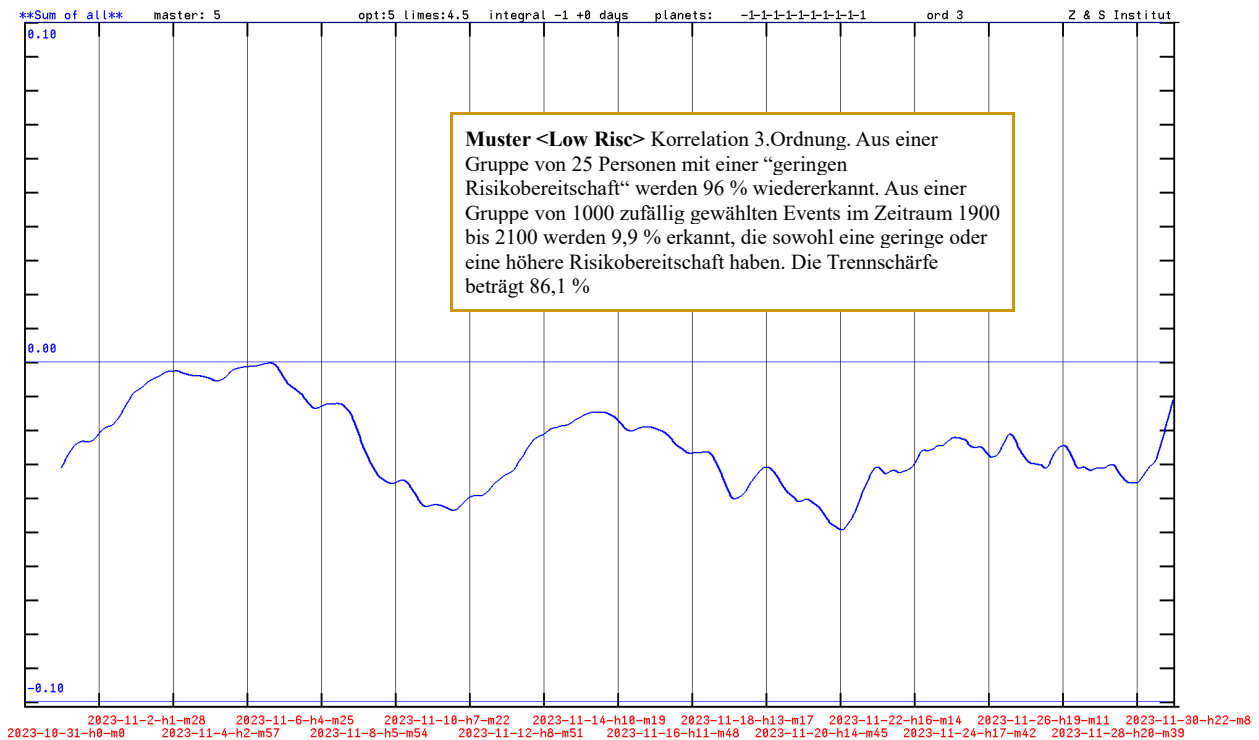

Figure 7: The probability for the characteristic "low risk-taking/strong need for harmony" when a person is born in November 2023. If the curve is above the center line, then this time falls into the pattern for a "low risk-taking/strong need for harmony".

Even these few, statistically validated research studies indicate that there is still a large field for further investigation. For this purpose, groups of people with the same character traits must be studied. If such groups show significant deviations from the continuum (average), patterns can be created for prognostics.

To the interested readers: If you know such groups of people with special, statistically secured character traits, you can send them to us for testing for significance. If it is a trait that deviates from the average, we can create a sample.

Artificial intelligence in the forecasting of earthquakes in November 2023.

The fluctuating planetary gravitational field influences not only activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly chosen control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

Mattern A

Group of the 41 strongest earthquakes of the last century (1900-2000).

The pattern used here finds 100% from the list of 41 strongest earthquakes. However, 25.8% of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) from the continuum is 74.2.

Figure 8: Curve of pattern A for the period 2023-8. Above the center line, the probability of a pattern A earthquake is greater.

Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or those that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena.) in the time period 1997-01-05 to 2002-06-18].

82% from the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a time period from 1900 to 2100.

Figure 9: Curve of pattern B. 513 earthquakes for the period 2023-7. Above the center line, the probability of a pattern A earthquake is greater.

Important: This does not exclude major earthquakes.

Fluctuations of the planetary gravitational field and nonlinear interactions with matter.

From the preface to the book

The hypothesis presented in this book arose by chance. My experience in creating a mathematical model for calculating partially-coherent light waves through optical systems, applied to the planetary system, led to an algorithm that can be interpreted as a nonlinear interaction of microgravity with matter. This does not describe causalities but only correlations of a probabilistic nature. A correlation function is developed that can describe changes in the probability of stable and unstable states in matter.

With the found correlation function the triggering of earthquakes was investigated as the first.

...

Previous studies related to the triggering of earthquakes do not take into account the interactions of the gravitation of the planets.

The studies of groups of earthquakes showed significant deviations from the control groups and confirmed the assumption that the harmonics of the planetary gravitational field have an influence on the triggering of earthquakes. Surprisingly, it was not only the harmonics of the Sun and Moon. These results suggested that it might be possible to use these harmonics to predict earthquakes as well, which was also confirmed that the correlation function found could be used to predict changes in the probability of earthquakes.

It was further suggested that the fluctuations of the planetary gravitational field could also have a stabilizing or destabilizing influence on other processes of evolution on Earth. The correlation function was applied to the structure formation of human intelligence and the stability of mental processes. Again, significant results were found in the statistical studies.

The results so far suggest that the correlation function may be suitable for describing influences on further processes of human evolution. The method can also be applied as an element of an artificial intelligence, ...

Michael E. Nitsche

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

ATLANTIS - 3045

An age lasting a thousand years comes to an end. It will later be called the Dark or Leaden Age. In secret, underground, in the caves and catacombs, something has developed that feels the power to beauty, harmony and eternal youth. Perhaps this will develop into an Atlantean, a Golden Age. Do we still speak of man, mankind even? No! It has reached the end of its evolution. Greed, laziness and fear, these driving forces of human civilization have reached the end point. Stupidly naive moral conceptions of a human herd and extremely decadent ways of life of an elite left only one exit open: Suicide - apocalypse. The brutal competition of the male aggression for the offspring and the female greed for the greatest male aggression for the own offspring, originating from the animal kingdom, could not be changed, for it ideologies and religions were insurmountable obstacles. Parts of mankind survived through artificial wombs and virgin birth. The male part no longer existed. A mostly peaceful world in harmony with nature emerged, a decaying world in which what was once technology became increasingly rare. A small pool of male children was raised for safety in a secluded reservation kept strictly secret from the rest of the population. With the onset of puberty, these specimens were transformed into girls. But the male element had not yet been completely defeated, when it happened that something succeeded which nobody had thought possible. An ancient dream of mankind was about to become reality. The dream of eternal youth. In a research institute that was working on the adaptation and optimization of virginity production, there existed a small research group that was allowed to conduct genetic experiments on the remaining male gene pool. There they succeeded in designing a male specimen of a new human being, with the potential of eternal life. But these specimens of a new man would allow very little differentiation; they were like identical twins and loved each other as such. Would it become a blessing or a curse to humanity? It was decided to destroy this small male gene pool immediately. But time had its own plans. On an island in the Atlantic Ocean, something existed that was created before the apocalypse and was supposed to allow high technology to survive. It survived without humans, although it was made for them. After it had a thousand years to find a way, it began to stir. The world was changing and had its own goals, beyond humans.

Publications in peer reviewed journals on this theory (with a German translation) can be found here: <http://www.planetare-korrelation.eu/Published%20articles.htm>

Guest posts

Do you have individuals, groups of individuals, special events or groups of events?

We will review you and, if suitable, conduct research and publish the results with you in our journal or in an international peer reviewed journal.

Your own research?

If you intend to conduct your own research independently of us, you can purchase the astro-basis program (manual here: <http://www.planetare-korrelation.eu/program-astro-2.htm>). With this program all research results were obtained, which were published in the international journals

Earth & Environmental Science Research & Reviews;

International Journal of Clinical & Medical Informatics;

Journal of Robotics and Automation Research;

Journal of High Energy Physics, Gravitation and Cosmology;

were published.

For further requirements you can also purchase the astro-extended program (manual here: <http://www.planetare-korrelation.eu/program-astro-extended.htm>). This program can among other things also carry out resonance examinations (transits) statistically secured.

Contact us, we will advise you!

Contract research for your personal questions

Do you need quality time for personal appointments, births, or groups of people?

We calculate the time quality matrices for you with statistical tests for significance.

For one appointment we will charge you 80,-€, for groups up to 30 events or persons 120,-€.

Sponsoring

Would you like to support our research financially?

Please get in touch with us. Your support can also refer to individual studies, for example. An internationally published research article can then include the addendum: "This research was

conducted by *Your name or company*.... sponsored. In addition, your name or company can - if you wish - be published on our homepage with a link.
