The quality of time

<http://www.zunds-institut.de/>

Wave astrology combines scientific research with the experiential knowledge of astrology

The constellations of the sun, moon and planets are beyond good and evil in their effect. Although people seem to love harmony more than disharmony, it is precisely disharmony that forces them to develop further. If a crisis, e.g. the midlife crisis, is actively and successfully lived through, you don't want to miss it later. This is because it has opened up new horizons, new landscapes and new life experiences.

Harmony that lasts too long in life can have devastating effects on people. Initial security, relaxation and peace turn into a leaden time that can end in catastrophe at some point.

Is there a life beyond harmony and disharmony? Probably not for us humans. We can only long for such a paradise.

Perhaps we can live in harmony with nature? Can we really do that, live in harmony with a nature in which the laws of evolution rule mercilessly? These are romantic ideas that have a great appeal to us humans, but which can probably never be realized.

Perhaps man will achieve immortality in the distant future, but then he will certainly no longer be a biological being and his harmonies and disharmonies will be on a different level.

Harmony and disharmony in January 2024

Let's look at the harmony and disharmony in January 2024:

Fig. 1: The quality of time in January 2024; full moon is on January 25, new moon on January 11

January 2024, like December last year, is very harmonious except for a few days. There is a period from January 5 to 15 when Mars as well as Jupiter and Saturn are harmonious. Is this a chance for peace negotiations if they haven't started yet in December? The world is changing. The BRICS states are accepting new members. Will the monopolistic world be replaced by a multipolar one?

Fig. 2 "A new year rises from the night"; from a quartet of seasons;

In his book "Who rules the world", Ian Morris established a criterion for the decline and fall of a civilization: A nation is in decline when the probability of an individual dying a violent death increases. It does not matter whether it is a democracy or a dictatorship.

Please always pay attention to the energy of the individual planets. The general time quality, as calculated in the curves, also applies to the people around you.

Look at the frame of the "Astrological Basic Principles" below. If you need <ability to do work; drive; energy; drive; energy; will; courage to start again;> then look at the curve of Mars, in which period it is harmonious. The curve should be above the midline.

Also take a look at the curves of the other planets, they may inhibit or promote your activities.

If you do not want < resistance; inhibition; stagnation; > in your undertakings, then look at the curves of Saturn, it should not lie below the line in the disharmonious area. You can find the energy of the basic principles in the figure below.

Astrological Primordial Principles

Energy (astrologically assigned to **Mars**)
 Ability to do work; drive; energetics; momentum; aggression; Energy; Will; Courage to start anew; Anger, spontaneity, strife;

Harmony (astrologically assigned to **Venus**)
 pleasant agreement of the parts of a whole; stability; beauty; love; aesthetics; Convenience; slovenliness; overindulgence;

Information (astrologically assigned to **Mercury**).
 Exchange of messages in coupled systems; communication; thinking; inquisitiveness; language; lack of concentration; superficiality;

Emotion (astrologically assigned to the **Moon**)
 Emotional movement; excitement; unconscious; longing; moodiness; depressed mood;

Egocentrism (astrologically assigned to the **Sun**)
 Center forming; central force; centralism; individualization; strength; ego force; arrogance; egoism; pride; vanity;

Transformation (astrologically assigned to the asteroid belt and alternatively to **Pluto**)
 Die and become; transformation; regeneration; upheavals; letting go; Tensions; tearing energy; destructivity;

Growth (astrologically assigned to **Jupiter**).
 Increase; expansion; multiplication; seeking dominion; Development; expansion; immoderation; loss of control;

Concentration (astrologically assigned to **Saturn**)
 gathering; crowding together; concentrating; solidifying; striving for stable order; Resistance; inhibition; stagnation;

Spontaneity (astrologically assigned to **Uranus**)
 sudden change; flash of thought; dissolution of ossified structures; originality; transformation of all values; eccentricity; chaos;

Reconciliation (astrologically assigned to **Neptune**).
 Homogenization; reconciliation; selflessness; altruism; Inspiration; deception; disappointment; illusions; addictions;

ATTENTION: These are astrological empirical values which have not yet (to our knowledge) been examined according to scientific criteria. Therefore, they can only be used as a guide for the evaluation of harmony (red) and disharmony (blue) of the planetary curves.

Biographical rhythms from the 60nd to the 72th year

(continued) Development no longer takes place in the outer world, but in the inner worlds.

The primordial principle of Saturn stands for structure and order, for rhythm, responsibility and maturity. However, Saturn also stands for age and loss, suffering and death. By this time at the latest, the realization that "not everything is possible anymore" sets in.

Concentrating on the essentials becomes a necessary task at this age.

This also includes organizing one's own life. Unfinished business in the broadest sense leads to stress.

Saturn was originally the god of the harvest. The actual harvest time in life begins at this stage of life.

Fig. 4 Biographical rhythms from 60 to 72

Which fruits are still to be harvested? Which ones can you use yourself? Which do you want to pass on? Harvest and sowing are connected. Do my fruits have seeds that I can still sow? For whom?

The Saturn principle can help you to gain more clarity and depth about your own life. The outward view should be transformed or changed into an inward view. The fateful background of one's biography can be recognized or divined. Knots can often be untangled. Supposed failures can reveal their meaningfulness.

The longer you live, the more clearly you see that the simple things are the really big ones.

Romano Guardini

The Greek philosopher Plato formulated this in his work "Menon", which he wrote at the age of 68: "...The mind only awakens when the body has already withered..."

In your late 60s and early 70s, your self-image and view of the world can change once again. It is an age when you have a good overview of life and the political and social situation. New things can be analyzed and classified more easily. In view of the increasingly visible physical limits of life, it is possible to concentrate once again on one's own individuation.

Carl Gustav Jung formulated the essential tasks of old age very clearly: "It is a duty and a necessity for old people to deal seriously with themselves."

Life needs to be shaped. Unless you try to distract yourself with artificial activities, too many experiences in the outside world or passive media consumption, your focus is on yourself, especially your personal past.

At the same time, depending on personal disposition, new tasks appropriate to age are sought. Individual ageing also depends on how life has been lived. There are many ways to give meaning to these years. It depends on the personality's own initiative. C. G. Jung says that life has the meaning that we give it. The meaning must be grasped by oneself. The more "seeds" are sown at a young age, the greater the choice of topics that can be taken up. This includes a wide range of social activities that incorporate one's own life experiences and which are often urgently needed. The younger and middle generations often benefit from this.

From this age onwards, illnesses occur more frequently. The ageing person gets to know their body anew. Pain and disabilities can be a burden for one or more days. In the physical area, teeth and skeleton are subject to the Saturn principle.

The quality of time at the birth of a person in January 2024

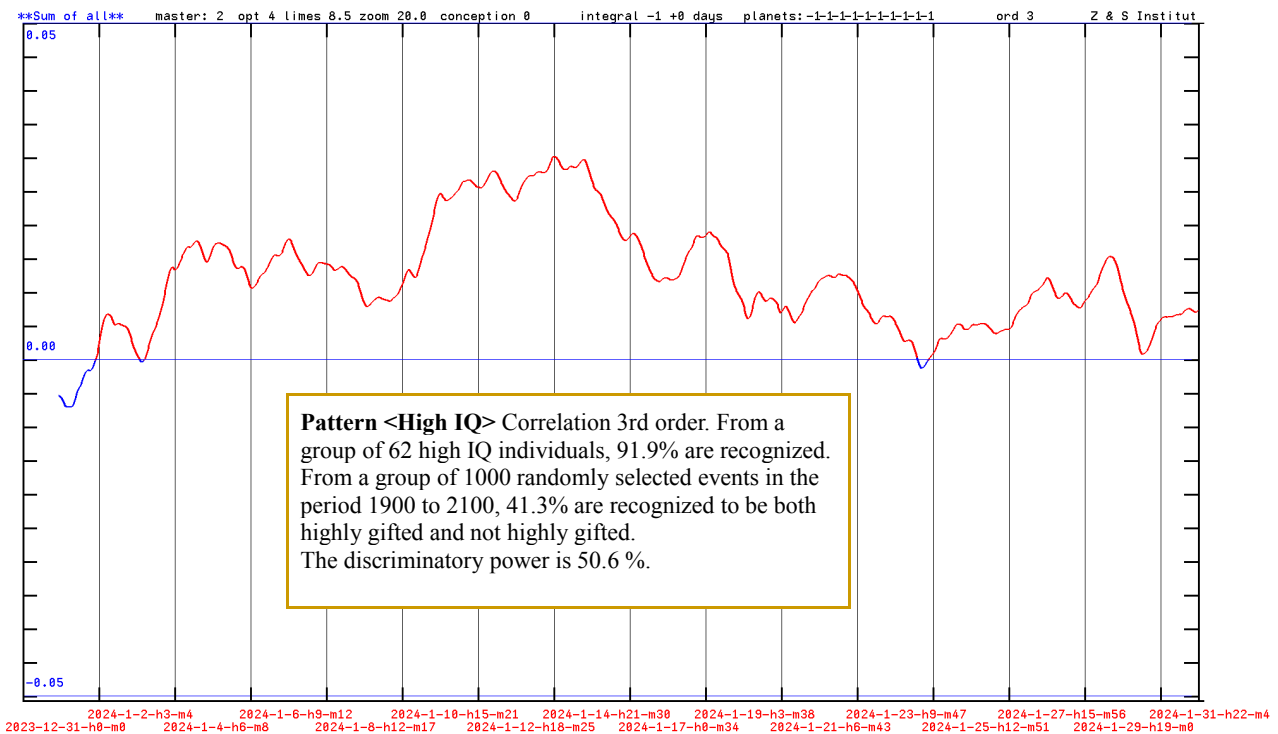

Fig. 5: The probability of a higher IQ at birth in January 2024. If the curve is above the center line, then this time falls into the "High IQ" pattern for gifted people.

Important: During the entire period, children are born with a high and a low intelligence quotient. The curves only show the changes in probability.

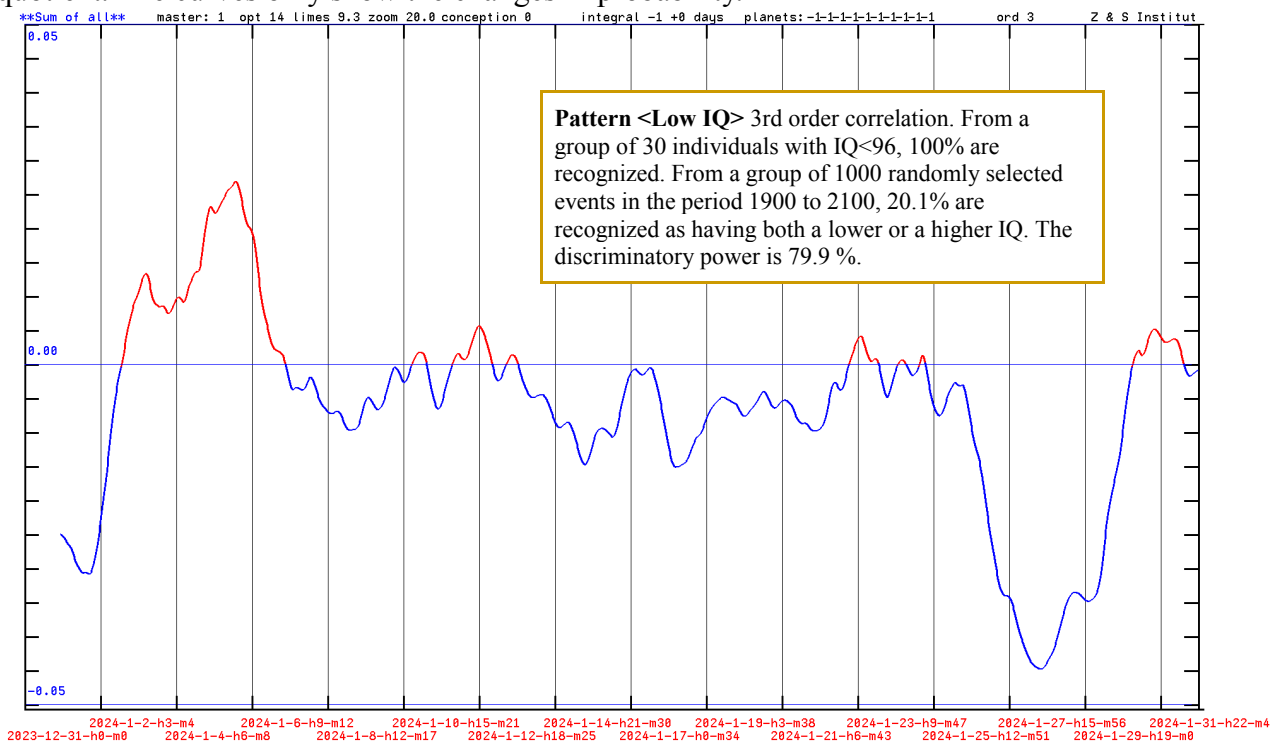

Fig. 6: The probability of a low IQ at birth in January 2024. If the curve is above the center line, then this time falls within the pattern for a low IQ.

Can these curves also be used for the start (birth) of projects?

There are no studies on this yet. But it could be a hypothesis.

Fig. 7: The probability for the characteristic "low risk appetite/strong need for harmony" when a person is born in January 2024. If the curve is above the center line, then this time falls into the pattern for a "low risk appetite/strong need for harmony"

Even these few statistically verified studies indicate that there is still a large field for further research. To this end, groups of people with the same character traits must be examined. If such groups show significant deviations from the continuum (average), patterns can be created for forecasting.

To interested readers: If you know of any such groups of people with special, statistically verified character traits, you can send them to us for significance testing. If it is a characteristic that deviates from the average, we can create a sample.

Artificial intelligence in the forecasting of earthquakes in January 2024

The fluctuating planetary gravitational field influences not only the activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly selected control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

Pattern A

Group of the 41 strongest earthquakes of the last century (1900-2000)

The pattern used here finds 100% of the list of the 41 strongest earthquakes. However, 25.8 % of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) to the continuum is 74.2 .

Fig. 8: Curve of pattern A for the period 2024-01. Above the center line, the probability of a pattern A earthquake is greater.

Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or ones that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena.) in the period 1997-01-05 to 2002-06-18].

82 % of the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a period from 1900 to 2100.

Fig. 9: Curve of pattern B. 513 earthquakes for the period 2024-01. Above the center line, the probability of a pattern A earthquake is greater.

Important: This does not rule out major earthquakes.

Planning the birth date of a baby in the month of January

Planning the birth of a child depends on many circumstances and conditions. The social circumstances of the partners, the time available and also the physical possibilities are significant influencing factors. Planning is easier if only artificial insemination is possible. The patterns currently being developed from the harmonics of the planetary oscillators (major planets) make it possible to specify time windows in which the change in the probability of higher (or lower) intelligence or lower risk behavior of the newborn can be seen. The time windows are calculated for a month in which the day of conception (conceptio) takes place. The duration of a pregnancy from the day of conception is given as 268 days. This is a statistical mean value that has a range of fluctuation.

The following curves show the time quality for the various patterns for 268 days later than January 2024, i.e. approx. 8 months + 24 days. These are the birth months of August and September of 2024.

Pattern <High IQ>

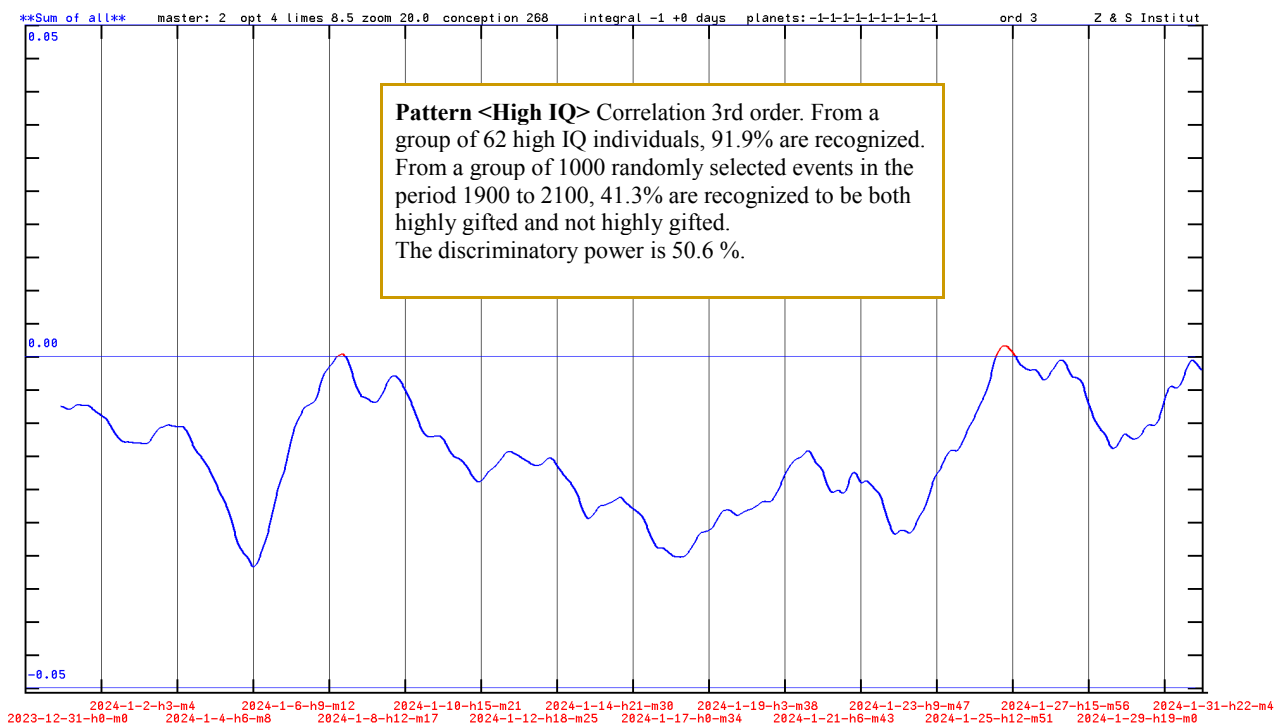

Fig. 10: The probability of a higher IQ at conception of an intended pregnancy in January 2024. If the curve is above the center line (red part of the curve), then this time falls into the "High IQ" pattern for high achievers. The birth takes place in August and September 2024 (8 months and 24 days later than January 2024).

Pattern <Low IQ>

Fig. 11: The probability of a lower IQ at conception of an intended pregnancy in January 2024. If the curve is above the center line (red part of the curve), then this time falls into the "Low IQ" pattern. The birth is in August and September of 2024 (8 months and 24 days later than January 2024).

Pattern <Low Risc>

Fig. 12: The probability of a lower risk of conceiving an intended pregnancy in January 2024. If the curve is above the center line (red part of the curve), then this time falls into the "low risk" pattern. The birth takes place in August and September 2024 (8 months and 24 days later than January 2024).

Please note: The changes in the probability for a higher IQ, for a lower IQ and for a lower risk probability of the child are relative to the genetic disposition and are no guarantee for a really high intelligence or a low risk propensity of a child.

Fluctuations of the planetary gravitational field and nonlinear interactions with matter.

From the preface to the book

The hypothesis presented in this book arose by chance. My experience in creating a mathematical model for calculating partially-coherent light waves through optical systems, applied to the planetary system, led to an algorithm that can be interpreted as a nonlinear interaction of microgravity with matter. This does not describe causalities but only correlations of a probabilistic nature. A correlation function is developed that can describe changes in the probability of stable and unstable states in matter.

With the found correlation function the triggering of earthquakes was investigated as the first.

...

Previous studies related to the triggering of earthquakes do not take into account the interactions of the gravitation of the planets.

The studies of groups of earthquakes showed significant deviations from the control groups and confirmed the assumption that the harmonics of the planetary gravitational field have an influence on the triggering of earthquakes. Surprisingly, it was not only the harmonics of the Sun and Moon. These results suggested that it might be possible to use these harmonics to predict earthquakes as well, which was also confirmed that the correlation function found could be used to predict changes in the probability of earthquakes.

It was further suggested that the fluctuations of the planetary gravitational field could also have a stabilizing or destabilizing influence on other processes of evolution on Earth. The correlation function was applied to the structure formation of human intelligence and the stability of mental processes. Again, significant results were found in the statistical studies.

The results so far suggest that the correlation function may be suitable for describing influences on further processes of human evolution. The method can also be applied as an element of an artificial intelligence, ...

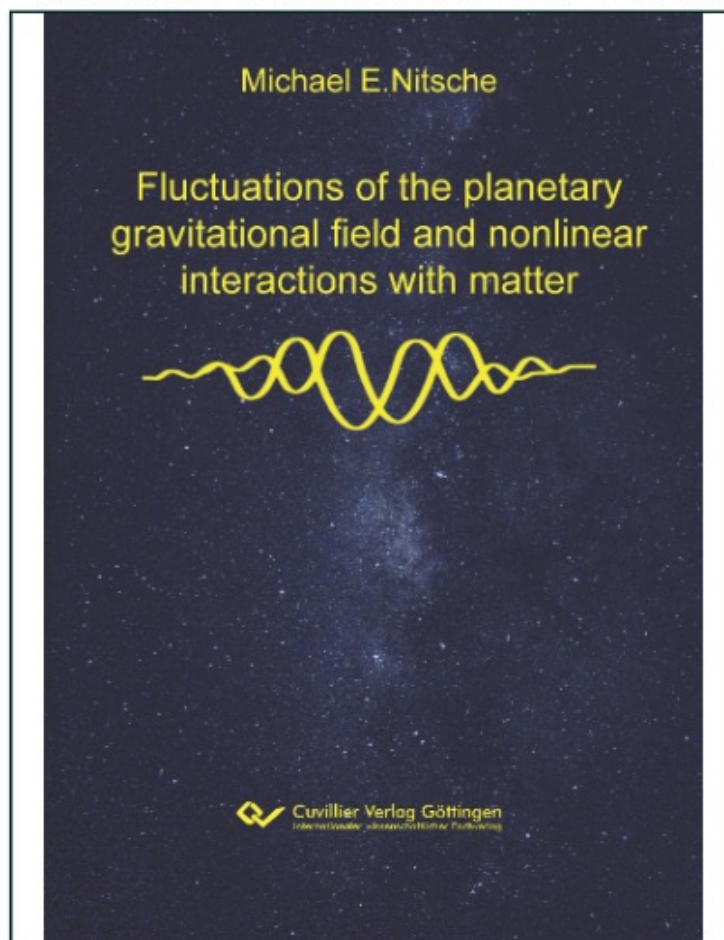

Michael E. Nitsche

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

ATLANTIS - 3045

An age lasting a thousand years comes to an end. It will later be called the Dark or Leaden Age. In secret, underground, in the caves and catacombs, something has developed that feels the power to beauty, harmony and eternal youth. Perhaps this will develop into an Atlantean, a Golden Age. Do we still speak of man, mankind even? No! It has reached the end of its evolution. Greed, laziness and fear, these driving forces of human civilization have reached the end point. Stupidly naive moral conceptions of a human herd and extremely decadent ways of life of an elite left only one exit open: Suicide - apocalypse. The brutal competition of the male aggression for the offspring and the female greed for the greatest male aggression for the own offspring, originating from the animal kingdom, could not be changed, for it ideologies and religions were insurmountable obstacles. Parts of mankind survived through artificial wombs and virgin birth. The male part no longer existed. A mostly peaceful world in harmony with nature emerged, a decaying world in which what was once technology became increasingly rare. A small pool of male children was raised for safety in a secluded reservation kept strictly secret from the rest of the population. With the onset of puberty, these specimens were transformed into girls. But the male element had not yet been completely defeated, when it happened that something succeeded which nobody had thought possible. An ancient dream of mankind was about to become reality. The dream of eternal youth. In a research institute that was working on the adaptation and optimization of virginity production, there existed a small research group that was allowed to conduct genetic experiments on the remaining male gene pool. There they succeeded in designing a male specimen of a new human being, with the potential of eternal life. But these specimens of a new man would allow very little differentiation; they were like identical twins and loved each other as such. Would it become a blessing or a curse to humanity? It was decided to destroy this small male gene pool immediately. But time had its own plans. On an island in the Atlantic Ocean, something existed that was created before the apocalypse and was supposed to allow high technology to survive. It survived without humans, although it was made for them. After it had a thousand years to find a way, it began to stir. The world was changing and had its own goals, beyond humans.
