Forecasting of earthquakes in February 2024

The quality of time at the birth of a human being in February 2024

Birth planning

*In his book "A Brief History of Mankind", Yuval Noah Harari analyzed previous forms of civilization, including democracy, and comes to a conclusion that is not positive for democracy. But which form of civilization can be judged so positively that it has a clear distance to the algorithms of evolution? Democracy also has an expiry date, the signs of which were already pointed out in the 2023-03 issue; "The quality of time".*

*If no opposing opinions are allowed in a democracy, then democracy has reached its final stage, even if it still calls itself that. We are experiencing an Orwellian change in the world of political terminology. Debts, for example, are becoming special assets. There are hardly any factual discussions any more, but instead demonizing polemics against other opinions.*

*Are the biographical rhythms the same for all generations? The curves published so far are only statistical curves. A mean value was assumed for the speed of the planets on their orbits. The retrograde motion of the planets as seen from Earth has not been taken into account. In this issue, we begin by looking at the individual rhythms and the rhythms that are characteristic of a generation.*

m.n.

# Harmony and disharmony in February 2024

Let's look at the harmony and disharmony in February 2024:

Fig. 1: The quality of time in February 2024; full moon is on February 24, new moon on February 9.

February 2024 is harmonious from the first to the twentieth day. Saturn is harmonious for most of the month. These are good conditions for bringing chaotic conditions into order. From February 21 to 25 there are strong disharmonies of relatively short duration. You can see which planets these are and how they work in the curves. Do not start anything new or constructive during this period. Do you want to end something or part with something? You could succeed during these disharmonies.

Fig. 2 "prince carnival "; from a quartet of seasons;

Please always pay attention to the energy of the individual planets. The general time quality, as calculated in the curves, also applies to the people around you.

Look at the frame of the "Astrological Basic Principles" below. If you need **<ability to do work; drive; energy; drive; energy; will; courage to start again;>** then look at the curve of Mars, in which period it is harmonious. The curve should be above the midline.

Also take a look at the curves of the other planets, they may inhibit or promote your activities. If you do not want **<resistance; inhibition; stagnation;>** in your undertakings, then look at the curves of Saturn, it should not lie below the line in the disharmonious area. You can find the energy of the basic principles in the figure below.

### Astrological Primordial Principles

**Energy** (astrologically assigned to **Mars**)  
 Ability to do work; drive; energetics; momentum; aggression; Energy; Will; Courage to start anew; Anger, spontaneity, strife;

**Harmony** (astrologically assigned to **Venus**)  
 pleasant agreement of the parts of a whole; stability; beauty; love; aesthetics; Convenience; slovenliness; overindulgence;

**Information** (astrologically assigned to **Mercury**).  
 Exchange of messages in coupled systems; communication; thinking; inquisitiveness; language; lack of concentration; superficiality;

**Emotion** (astrologically assigned to the **Moon**)  
 Emotional movement; excitement; unconscious; longing; moodiness; depressed mood;

**Egocentrism** (astrologically assigned to the **Sun**)  
 Center forming; central force; centralism; individualization; strength; ego force; arrogance; egoism; pride; vanity;

**Transformation** (astrologically assigned to the asteroid belt and alternatively to **Pluto**)  
 Die and become; transformation; regeneration; upheavals; letting go; Tensions; tearing energy; destructivity;

**Growth** (astrologically assigned to **Jupiter**).  
 Increase; expansion; multiplication; seeking dominion; Development; expansion; immoderation; loss of control;

**Concentration** (astrologically assigned to **Saturn**)  
 gathering; crowding together; concentrating; solidifying; striving for stable order; Resistance; inhibition; stagnation;

**Spontaneity** (astrologically assigned to **Uranus**)  
 sudden change; flash of thought; dissolution of ossified structures; originality; transformation of all values; eccentricity; chaos;

**Reconciliation** (astrologically assigned to **Neptune**).  
 Homogenization; reconciliation; selflessness; altruism; Inspiration; deception; disappointment; illusions; addictions;

**ATTENTION:** These are astrological empirical values which have not yet (to our knowledge) been examined according to scientific criteria. Therefore, they can only be used as a guide for the evaluation of harmony (red) and disharmony (blue) of the planetary curves.

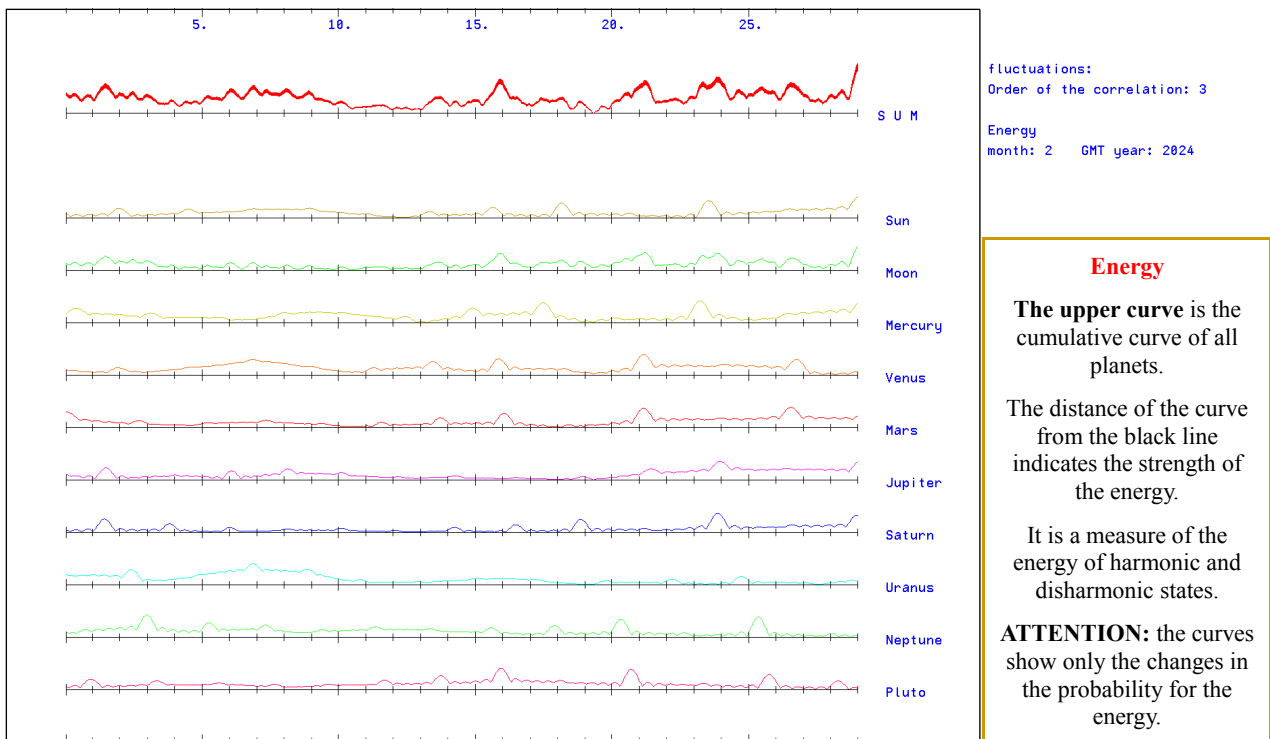

Fig. 3: The energy of the quality of time in February 2024

## Biographical rhythms from the 60nd to the 72th year

(continued) In early childhood Saturn has a constructive relationship to the mineralization of the bones and thus to the erectile strength of the small body as well as to the change of teeth until the child is ready for school. At an older age, the bones become demineralized, they become more brittle and clumsy, the height of the body decreases as the intervertebral spaces lose their elasticity, the gait becomes unsteady and many people walk with a stoop. The loss of teeth is also a clear sign of ageing. At an advanced age, the rhythms of Saturn return to the body, as was the case in the first 12 years of development. Now, however, they are processes of degradation.

Fig. 4 Biographical rhythms from 60 to 72

As long as a person has his mental abilities at his disposal, it is also his decision how much space he gives to physical efforts.

Saturn as the god of time forces us to change the way we deal with our lifetime. This realization is not new.

Once again, we need to review the baggage of life. Ballast must be discarded, the rest must be organized and adapted to age. Saturn's principle leads to reduction, to simplicity and manageability.

Concentrating on your own being becomes more important. Saturn leads us to ourselves. It is a lonely path. Shadow themes can cause difficulties in every phase of the second half of life. These are areas of life that were not lived or could not be lived in the first half of life. They had slipped into the shadows and are now resurfacing, often unexpectedly. Now they should be integrated into life, if possible without radical solutions.

*Do not wait for a later,  
convenient time,  
because you are not  
sure if you will have it.  
Time slips away  
unnoticed. Therefore -  
if you are wise - do not  
miss any time. And does  
not give away the  
present hour that  
belongs to him unused  
for another hour that is  
not yet his own.  
Catherine of Siena  
1347 - 1380*

At the age of 60, Jupiter is at the place of birth for the 6th time. The spiritual horizon has widened. The mountain peak becomes clearer.

**Summary: Crises and highlights between the ages of 60 and 72**

The time around the 60th birthday is restless. This remains the case until around the age of 67, but is alleviated by harmonies between Jupiter and itself and Saturn and itself. The square of Uranus to itself between 63 and 65 years and the square of Saturn to itself between 66 and 67 years should certainly be noted.

Please note that there may be slight individual shifts. The individual transits should also be taken into account when important decisions are to be made.

At around 66 / 67 years of age, the harmonies of Saturn and Uranus suggest more clarity and openness to new possibilities, provided the years before have been used wisely. A favorable time quality cannot work miracles in life if major wrong decisions have been made, but it can alleviate some things because the harmonic rhythms provide some "tailwind".

Around the 70th birthday, the rhythms of Jupiter, Saturn, Uranus and Neptune are largely harmonious. This birthday is often celebrated "once again" on a grand scale. Some guests who were present at the 60th birthday are missing. This is the downer and gives food for thought.

*(To be continued)*

## The quality of time at the birth of a person in February 2024

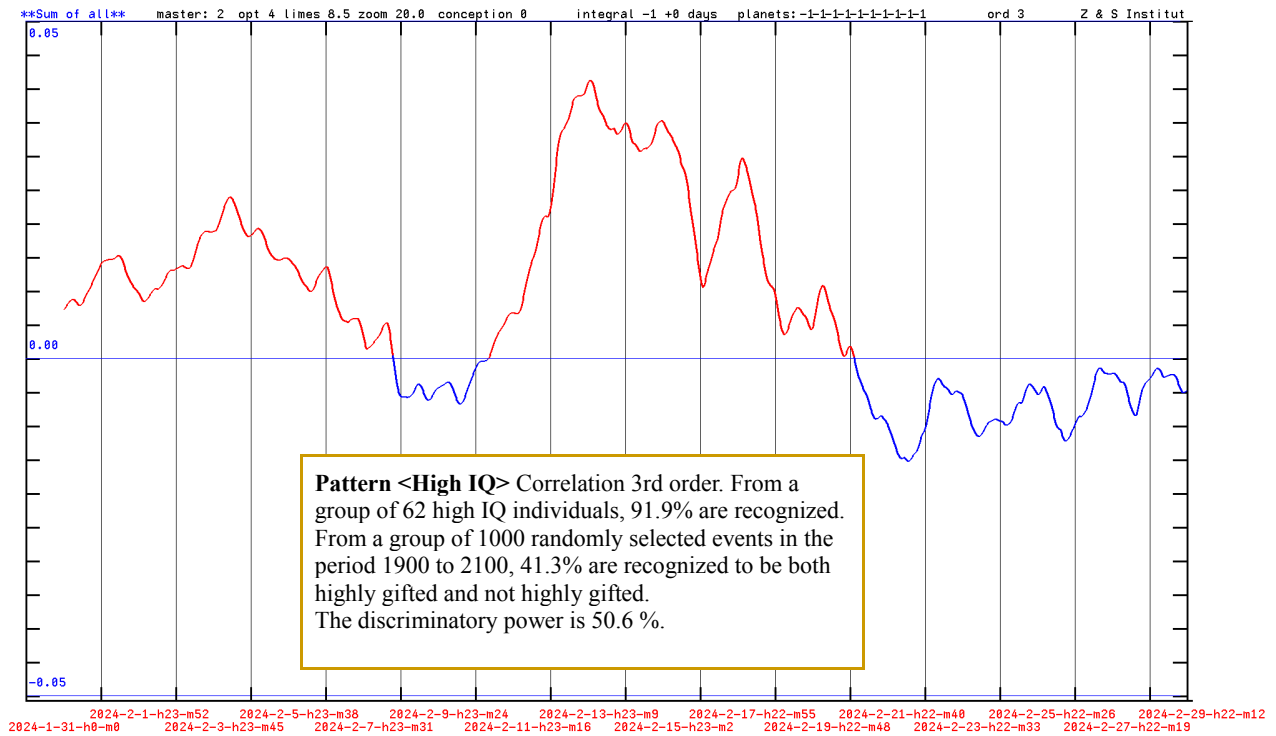

Fig. 5: The probability of a higher IQ at birth in February 2024. If the curve is above the center line, then this time falls into the "High IQ" pattern for gifted people.

**Important:** During the entire period, children are born with a high and a low intelligence quotient. The curves only show the changes in probability.

Fig. 6: The probability of a low IQ at birth in February 2024. If the curve is above the center line, then this time falls within the pattern for a low IQ.

Can these curves also be used for the start (birth) of projects?  
 There are no studies on this yet. But it could be a hypothesis.

Fig. 7: The probability for the characteristic "low risk appetite/strong need for harmony" when a person is born in February 2024. If the curve is above the center line, then this time falls into the pattern for a "low risk appetite/strong need for harmony"

Even these few statistically verified studies indicate that there is still a large field for further research. To this end, groups of people with the same character traits must be examined. If such groups show significant deviations from the continuum (average), patterns can be created for forecasting.

**To interested readers:** If you know of any such groups of people with special, statistically verified character traits, you can send them to us for significance testing. If it is a characteristic that deviates from the average, we can create a sample.

## Artificial intelligence in the forecasting of earthquakes in February 2024

The fluctuating planetary gravitational field influences not only the activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly selected control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

### Pattern A

Group of the 41 strongest earthquakes of the last century (1900-2000)

*The pattern used here finds 100% of the list of the 41 strongest earthquakes. However, 25.8 % of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) to the continuum is 74.2 .*

Fig. 8: Curve of pattern A for the period 2024-02. Above the center line, the probability of a pattern A earthquake is greater.

### Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or ones that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena. ) in the period 1997-01-05 to 2002-06-18].

82 % of the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a period from 1900 to 2100.

Fig. 9: Curve of pattern B. 513 earthquakes for the period 2024-02. Above the center line, the probability of a pattern A earthquake is greater.

**Important:** This does not rule out major earthquakes.

## Planning the birth date of a baby in the month of February

Planning the birth of a child depends on many circumstances and conditions. The social circumstances of the partners, the time available and also the physical possibilities are significant influencing factors. Planning is easier if only artificial insemination is possible.

The patterns currently being developed from the harmonics of the planetary oscillators (major planets) make it possible to specify time windows in which the change in the probability of higher (or lower) intelligence or lower risk behavior of the newborn can be seen.

The time windows are calculated for a month in which the day of conception (conceptio) takes place. The duration of a pregnancy from the day of conception is given as 268 days. This is a statistical mean value that has a range of fluctuation.

The following curves show the time quality for the various patterns for 268 days later than February 2024, i.e. approx. 8 months + 24 days. These are the birth months of August and September of 2024.

### Pattern <High IQ>

Fig. 10: The probability of a higher IQ at conception of an intended pregnancy in February 2024. If the curve is above the center line (red part of the curve), then this time falls into the "High IQ" pattern for high achievers. The birth takes place in August and September 2024 (8 months and 24 days later than February 2024).

### Pattern <Low IQ>

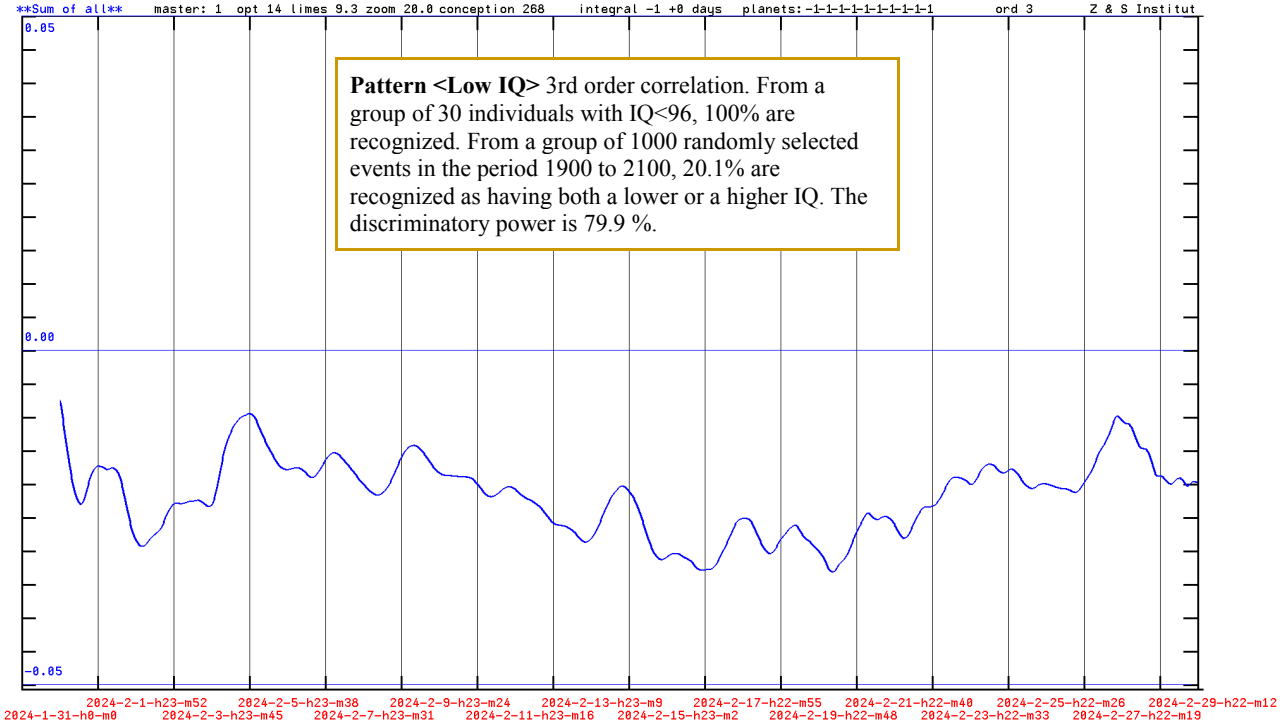

Fig. 11: The probability of a lower IQ at conception of an intended pregnancy in February 2024. If the curve is above the center line (red part of the curve), then this time falls into the "Low IQ" pattern. The birth is in August and September of 2024 (8 months and 24 days later than February 2024).

### Pattern <Low Risc>

Fig. 12: The probability of a lower risk of conceiving an intended pregnancy in February 2024. If the curve is above the center line (red part of the curve), then this time falls into the "low risk" pattern. The birth takes place in August and September 2024 (8 months and 24 days later than February 2024).

Please note: The changes in the probability for a higher IQ, for a lower IQ and for a lower risk probability of the child are relative to the genetic disposition and are no guarantee for a really high intelligence or a low risk propensity of a child.

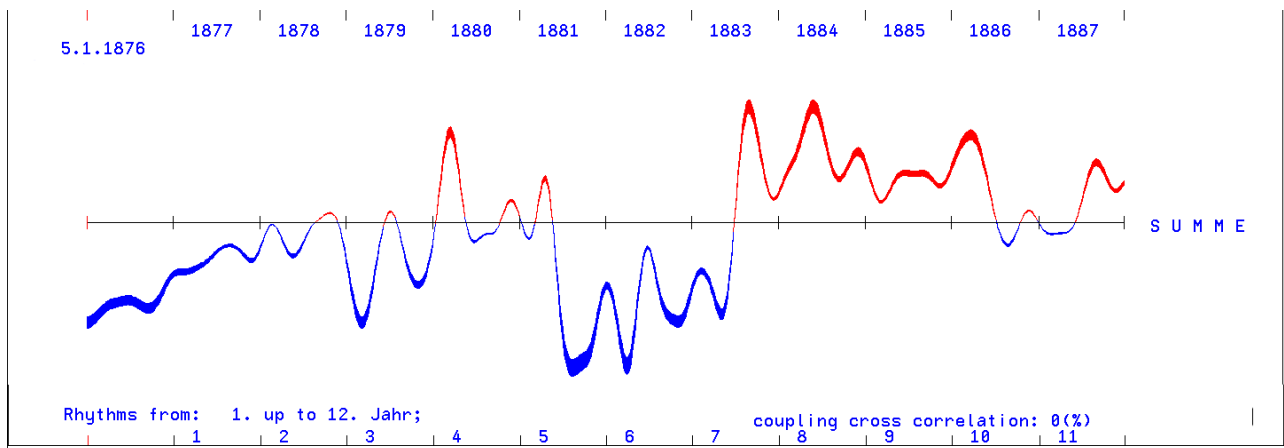

### Individual biographical rhythms 0 to 12 years

The rhythm curves previously published in this magazine always referred to an average orbital speed of the planets. The current orbital speed and the retrograde motion of the planets were not

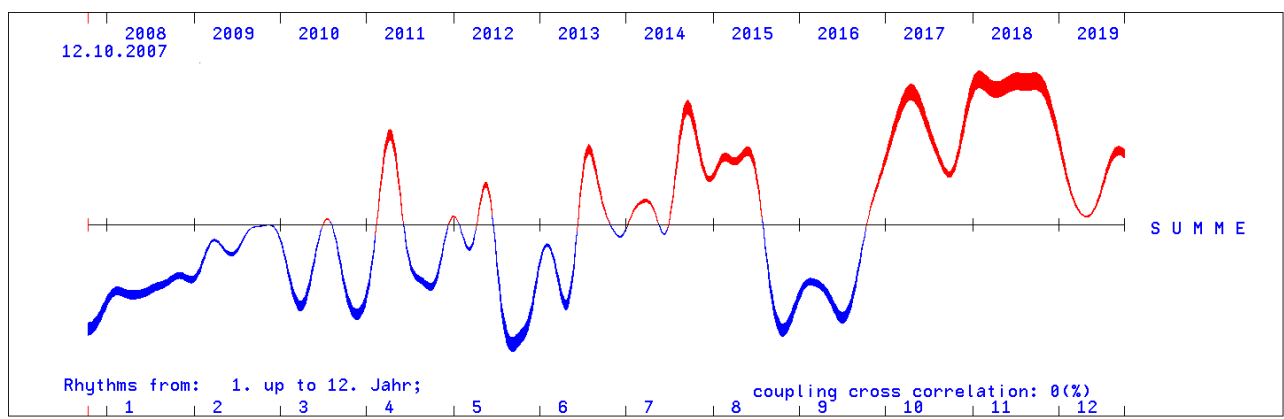

taken into account. Therefore, the individual biographical rhythms may deviate from these statistical averages. Here are two individual rhythms \*1878-01-05 and \*2007-10-12.

**Fig. 13** Mean biographical rhythms from birth to the age of 12. Primarily the superimposition of the major planets Jupiter and Saturn.

**Fig. 14** Biographical rhythms from birth to the age of 12 for \*1878-01-05.

**Fig. 15** Biographical rhythms from birth to age 12 for \*2007-10-12.

In Figures 14 and 15, the lower scales are labeled for whole years and thus shifted against each other, as the first birth took place at the beginning of the year and the second almost at the end of the year.

It is clear from the two figures that these are different generations. In the first example there is a

strong disharmony from the 6th to the 8th year of life, in the second example there is even a harmonious period around the 7th year.

In both examples, the "marriage of childhood" is also pronounced differently.

Are there harmonious and disharmonious periods that apply to all generations? For this purpose, 1000 years (1500 to 2500) were calculated with an increment of 3.6525 days. The calculated curves were superimposed. The result is shown in Figure 16.

The graph shows the areas that are likely to be harmonious (red) or disharmonious (blue). If there are only harmonious red areas in a life stage, the probability is very high that all individuals of a generation are harmonious in these periods. This always applies to the area around the age of 10. From the middle of the 6th to the middle of the 7th year of life, all individual curves are disharmonious. Beyond this, there are smaller periods that are either harmonious or disharmonious. The 10th year of life is always disharmonious.

**Fig. 16** Biographical rhythms from birth to the age of 12 for the period from 1500 to 2500.

Only Jupiter and Saturn are developmentally dominant during this period. Three major instabilities or developmental crises can be identified.

The first is birth, which undoubtedly represents a crisis for the individual.

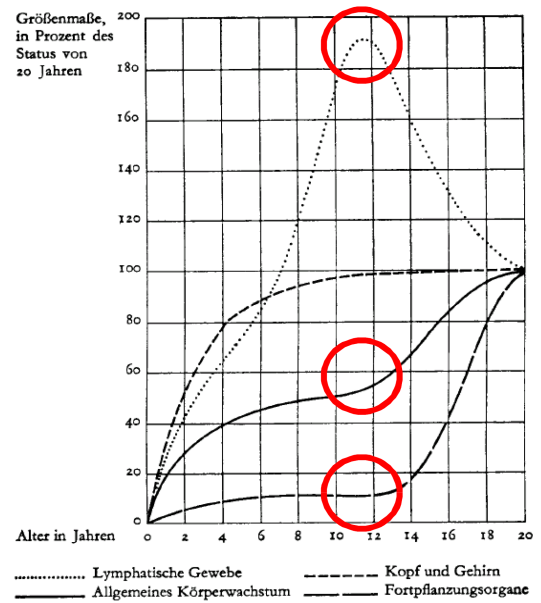

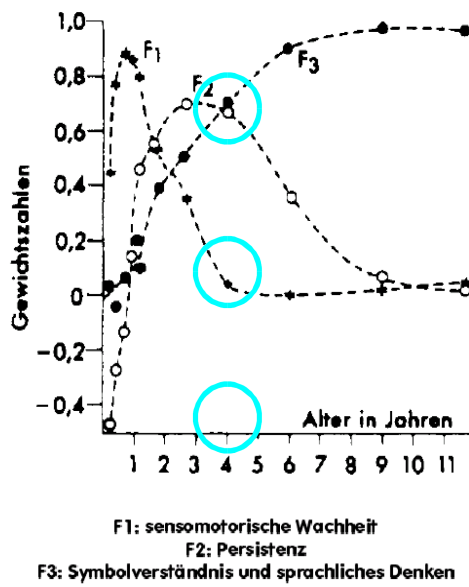

The second crisis initiates the "defiant phase" around the third year of life. As the illustration shows, this phase of defiance is very likely to be reached, but it does not necessarily have to be severe.

A third phase of instability begins around the age of 6. The external appearance of children also changes considerably. The period around the ages of 6 and 7 is a major turning point for all children. This is usually associated with starting school and changing teeth.

In addition to phases of instability and disharmony, there are also two phases of particular stability and harmony.

The first phase is the child's "charm" around the age of 4 ("Between the ages of 3 and 5, the toddler takes on a charm that never returns..." from: Bammes Gottfried; "Der nackte Mensch - Künstleranatomie"). During this time, the annual growth in length slows down (Fig. 17). It does not increase again until puberty. Sensorimotor alertness has also slowed down.

The second phase is the "peak of childhood" around the ages of 10 and 11. The proportions of the body are relatively harmonious. The lymphatic tissue has reached its peak. It is the calm before the storm of the following puberty.

**Fig. 17** Developmental psychology of childhood and adolescence (after Tücke, Manfred; Entwicklungspsychologie des Kindes- und Jugendalters, ISBN: 978-3-8258-0157-1 ). In the left-hand image, the harmonious and stable phase around the age of 4 is marked with a blue circle. In the picture on the right, the peak of childhood from the 10th to 13th year is marked with a red circle

The period of life from birth to the age of 12 reveals the effect of the oscillators (planets) Jupiter and Saturn on human development. Jupiter promotes growth and expansion, Saturn concentration and consolidation. *Continued*

## **Fluctuations of the planetary gravitational field and nonlinear interactions with matter.**

### *From the preface to the book*

The hypothesis presented in this book arose by chance. My experience in creating a mathematical model for calculating partially-coherent light waves through optical systems, applied to the planetary system, led to an algorithm that can be interpreted as a nonlinear interaction of microgravity with matter. This does not describe causalities but only correlations of a probabilistic nature. A correlation function is developed that can describe changes in the probability of stable and unstable states in matter.

With the found correlation function the triggering of earthquakes was investigated as the first.

...

Previous studies related to the triggering of earthquakes do not take into account the interactions of the gravitation of the planets.

The studies of groups of earthquakes showed significant deviations from the control groups and confirmed the assumption that the harmonics of the planetary gravitational field have an influence on the triggering of earthquakes. Surprisingly, it was not only the harmonics of the Sun and Moon. These results suggested that it might be possible to use these harmonics to predict earthquakes as well, which was also confirmed that the correlation function found could be used to predict changes in the probability of earthquakes.

It was further suggested that the fluctuations of the planetary gravitational field could also have a stabilizing or destabilizing influence on other processes of evolution on Earth. The correlation function was applied to the structure formation of human intelligence and the stability of mental processes. Again, significant results were found in the statistical studies.

The results so far suggest that the correlation function may be suitable for describing influences on further processes of human evolution. The method can also be applied as an element of an artificial intelligence, ...

Michael E. Nitsche

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

Michael E. Nitsche (Autor)

### ATLANTIS - 3045

*An age lasting a thousand years comes to an end. It will later be called the Dark or Leaden Age. In secret, underground, in the caves and catacombs, something has developed that feels the power to beauty, harmony and eternal youth. Perhaps this will develop into an Atlantean, a Golden Age. Do we still speak of man, mankind even? No! It has reached the end of its evolution. Greed, laziness and fear, these driving forces of human civilization have reached the end point. Stupidly naive moral conceptions of a human herd and extremely decadent ways of life of an elite left only one exit open: Suicide - apocalypse. The brutal competition of the male aggression for the offspring and the female greed for the greatest male aggression for the own offspring, originating from the animal kingdom, could not be changed, for it ideologies and religions were insurmountable obstacles. Parts of mankind survived through artificial wombs and virgin birth. The male part no longer existed. A mostly peaceful world in harmony with nature emerged, a decaying world in which what was once technology became increasingly rare. A small pool of male children was raised for safety in a secluded reservation kept strictly secret from the rest of the population. With the onset of puberty, these specimens were transformed into girls. But the male element had not yet been completely defeated, when it happened that something succeeded which nobody had thought possible. An ancient dream of mankind was about to become reality. The dream of eternal youth. In a research institute that was working on the adaptation and optimization of virginity production, there existed a small research group that was allowed to conduct genetic experiments on the remaining male gene pool. There they succeeded in designing a male specimen of a new human being, with the potential of eternal life. But these specimens of a new man would allow very little differentiation; they were like identical twins and loved each other as such. Would it become a blessing or a curse to humanity? It was decided to destroy this small male gene pool immediately. But time had its own plans. On an island in the Atlantic Ocean, something existed that was created before the apocalypse and was supposed to allow high technology to survive. It survived without humans, although it was made for them. After it had a thousand years to find a way, it began to stir. The world was changing and had its own goals, beyond humans.*

Publications in peer reviewed journals on this theory (with a German translation) can be found here: <http://www.planetare-korrelation.eu/Published%20articles.htm>

## Guest posts

Do you have individuals, groups of individuals, special events or groups of events?

We will review you and, if suitable, conduct research and publish the results with you in our journal or in an international peer reviewed journal.

## Your own research?

If you intend to conduct your own research independently of us, you can purchase the astro-basis program (manual here: <http://www.planetare-korrelation.eu/program-astro-2.htm> ). With this program all research results were obtained, which were published in the international journals

*Earth & Environmental Science Research & Reviews;*

*International Journal of Clinical & Medical Informatics;*

*Journal of Robotics and Automation Research;*

*Journal of High Energy Physics, Gravitation and Cosmology;*

were published.

For further requirements you can also purchase the astro-extended program (manual here: <http://www.planetare-korrelation.eu/program-astro-extended.htm> ). This program can among other things also carry out resonance examinations (transits) statistically secured.

**Contact us, we will advise you!**

## Contract research for your personal questions

**Do you need quality time for personal appointments, births, or groups of people?**

We calculate the time quality matrices for you with statistical tests for significance.

For one appointment we will charge you 80,-€, for groups up to 30 events or persons 120,-€.

## Sponsoring

**Would you like to support our research financially?**

Please get in touch with us. Your support can also refer to individual studies, for example. An internationally published research article can then include the addendum: "This research was conducted by ..... *Your name or company*.... sponsored. In addition, your name or company can - if you wish - be published on our homepage with a link.

**Contact us, we will advise you!**
