Forecasting of earthquakes in  
March 2024

The quality of time at the birth  
of a human being in March  
2024

Birth planning

*The year 2045 is the year of the apocalypse for the Fermi Paradox and also the year of the Technological Singularity according to Raymond Kurzweil. In his book "Who rules the world? Why civilizations rule or are ruled", Ian Morris mentions five Horsemen of the Apocalypse by name, which can serve as signs of a world turning into a dark age. He arrives at these 5 cardinal signs from an analysis of the past ten thousand years of human development.*

*The Horsemen of the Apocalypse according to Morris are:*

- 1. famines*
- 2. epidemics*
- 3. uncontrolled migration*
- 4. political instability*
- 5. climate change*

*Based on the experience of previous studies (see "The Quality of Time" - issue 2023-03), there is indeed an increased probability of an apocalypse due to planetary disharmony around the year 2045.*

*Which of these horsemen are already visible on the horizon?*

*However, an apocalypse does not necessarily mean the end of humanity.*

# Harmony and disharmony in March 2024

Let's look at the harmony and disharmony in March 2024:

Fig. 1: The quality of time in March 2024; full moon is on March 24, new moon on March 9.

Like April, March 2024 is also harmonious, apart from a few days. Jupiter is in harmony for almost the entire month. These are good conditions for advancing processes aimed at expansion or growth. The quality of time is comparable to an ocean. Harmony and disharmony arrive as waves. Can you ride these waves, can you use them for an upswing? Look at the beginning, or time around the 23rd of the month. A disharmony (wave trough) is followed by a harmony (wave crest).

Fig. 2 "March"; from a quartet of seasons;

Look at the energy on the days in question, it is higher. Start in the wave trough and then let yourself be lifted into harmony on the wave crest. This is riding the waves on the ocean of time. Also look at the planets to get an idea of which wave crest you are being lifted onto.

Look at the frame of the "Astrological Basic Principles" below. If you need <ability to do work; drive; energy; drive; energy; will; courage to start again;> then look at the curve of Mars, in which period it is harmonious. The curve should be above the midline.

Also take a look at the curves of the other planets, they may inhibit or promote your activities. If you do not want <resistance; inhibition; stagnation;> in your undertakings, then look at the curves of Saturn, it should not lie below the line in the disharmonious area. You can find the energy of the basic principles in the figure below.

**Astrological Primordial Principles**

**Energy** (astrologically assigned to **Mars**)  
 Ability to do work; drive; energetics; momentum; aggression; Energy; Will; Courage to start anew; Anger, spontaneity, strife;

**Harmony** (astrologically assigned to **Venus**)  
 pleasant agreement of the parts of a whole; stability; beauty; love; aesthetics; Convenience; slovenliness; overindulgence;

**Information** (astrologically assigned to **Mercury**).  
 Exchange of messages in coupled systems; communication; thinking; inquisitiveness; language; lack of concentration; superficiality;

**Emotion** (astrologically assigned to the **Moon**)  
 Emotional movement; excitement; unconscious; longing; moodiness; depressed mood;

**Egocentrism** (astrologically assigned to the **Sun**)  
 Center forming; central force; centralism; individualization; strength; ego force; arrogance; egoism; pride; vanity;

**Transformation** (astrologically assigned to the asteroid belt and alternatively to **Pluto**)  
 Die and become; transformation; regeneration; upheavals; letting go; Tensions; tearing energy; destructivity;

**Growth** (astrologically assigned to **Jupiter**).  
 Increase; expansion; multiplication; seeking dominion; Development; expansion; immoderation; loss of control;

**Concentration** (astrologically assigned to **Saturn**)  
 gathering; crowding together; concentrating; solidifying; striving for stable order; Resistance; inhibition; stagnation;

**Spontaneity** (astrologically assigned to **Uranus**)  
 sudden change; flash of thought; dissolution of ossified structures; originality; transformation of all values; eccentricity; chaos;

**Reconciliation** (astrologically assigned to **Neptune**).  
 Homogenization; reconciliation; selflessness; altruism; Inspiration; deception; disappointment; illusions; addictions;

**ATTENTION:** These are astrological empirical values which have not yet (to our knowledge) been examined according to scientific criteria. Therefore, they can only be used as a guide for the evaluation of harmony (red) and disharmony (blue) of the planetary curves.

Fig. 3: The energy of the quality of time in March 2024

## Biographical rhythms from the 72nd to the 48th year

Picture from mitjourney, like Caspar David Friedrich

### Consolidation and freedom: 72 to 84 years

The last or penultimate unfolding phase of life begins. The superposition curve shows the alternation of clear disharmonies and harmonies, of crises and stability. The life curve is inclined.

At 71 to 72 years of age, man has experienced a "world day". Between 25,920 and 26,000 days have passed since birth. The vernal equinox has moved backwards by  $1^\circ$  in the zodiac. The great rhythm of the vernal equinox is reflected in the individual lifespan.

Fig. 4 Biographical rhythms from 72 to 84

Those who can still be physically and mentally active in this phase of life will find the essence of their life. The ability to perceive the world, the "outer things", may diminish, but the path inwards, towards oneself, becomes more interesting and important. C.G. Jung formulated this very radically, albeit at a much younger age.

It is a realization that leads people to themselves. The real development in life is the path to self-knowledge. In ancient times, the Temple of Apollo at Delphi bore the inscription: "Know thyself".

*The sun draws in its rays to illuminate itself after it has wasted its light on a world.*

*"Carl Gustav Jung (GW vol. 8, § 785) 1347 - 1380*

Friedrich Nietzsche was also of the opinion that life is about self-knowledge: "Know thyself is the whole science. Only at the end of the knowledge of all things will man have recognized himself."

At the beginning of this age phase, Saturn and then Jupiter are in disharmony. Their effect depends on how the last few years have been lived. It is a time of crisis that confronts finiteness. The "lightness of being" has long since been lost for the majority. Once again, it is a matter of concentrating on what is still essential, what is still important and possible in life. This certainly includes resolving entanglements in the area of contact and clarifying material matters.

### **Inheritance matters should be dealt with now at the latest.**

The Saturn principle is also related to spiritual maturity. A still strong entanglement in matter brings suffering. Only by breaking away from too strong an attachment to matter can the freedom be gained that enables development in spiritual areas. Connecting with themes that belong to the treasures of humanity can uplift the soul and spirit and free them from pain and fear.

At 73 /74, until almost 75, the superior curve indicates tensions related to Jupiter and Saturn. Jupiter is in square to itself, Saturn in opposition. Saturn's opposition to itself was already decisive twice at around 15 (puberty) and at around 45/46. Saturn, the great teacher, tests life again for debit and credit. Once again a major period of upheaval can begin in life. If the physical strength and material resources are available, this age sometimes sees a radical departure from the usual life situation, from a structure that is no longer wanted. Familiar duties are perceived as an unpleasant burden. The realization that time is running out can lead to serious decisions that are not understood by those around them. This applies in particular to separations and divorces. At present, more and more women are leaving their marriages after 40 and even 50 years of marriage, even if they have just celebrated their golden wedding anniversary on a larger scale.

*(to be continued)*

## The quality of time at the birth of a person in March 2024

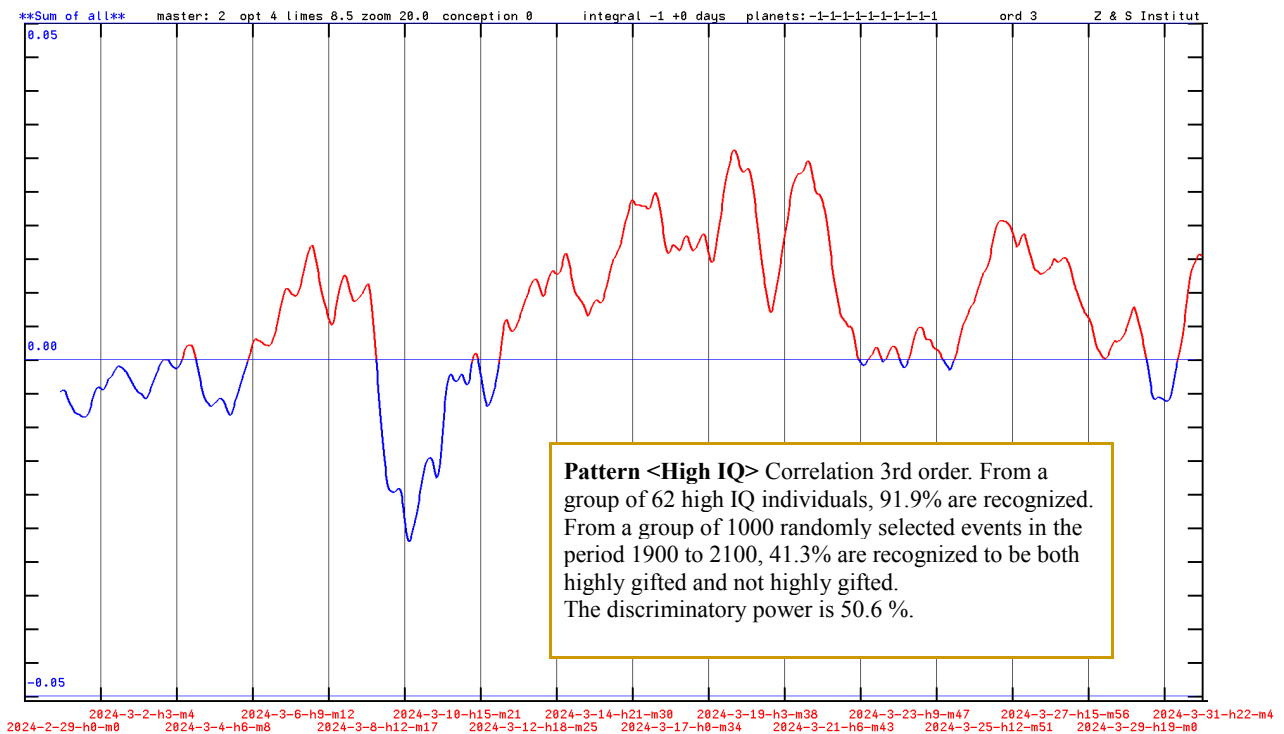

Fig. 5: The probability of a higher IQ at birth in March 2024. If the curve is above the center line, then this time falls into the "High IQ" pattern for gifted people.

**Important:** During the entire period, children are born with a high and a low intelligence quotient. The curves only show the changes in probability.

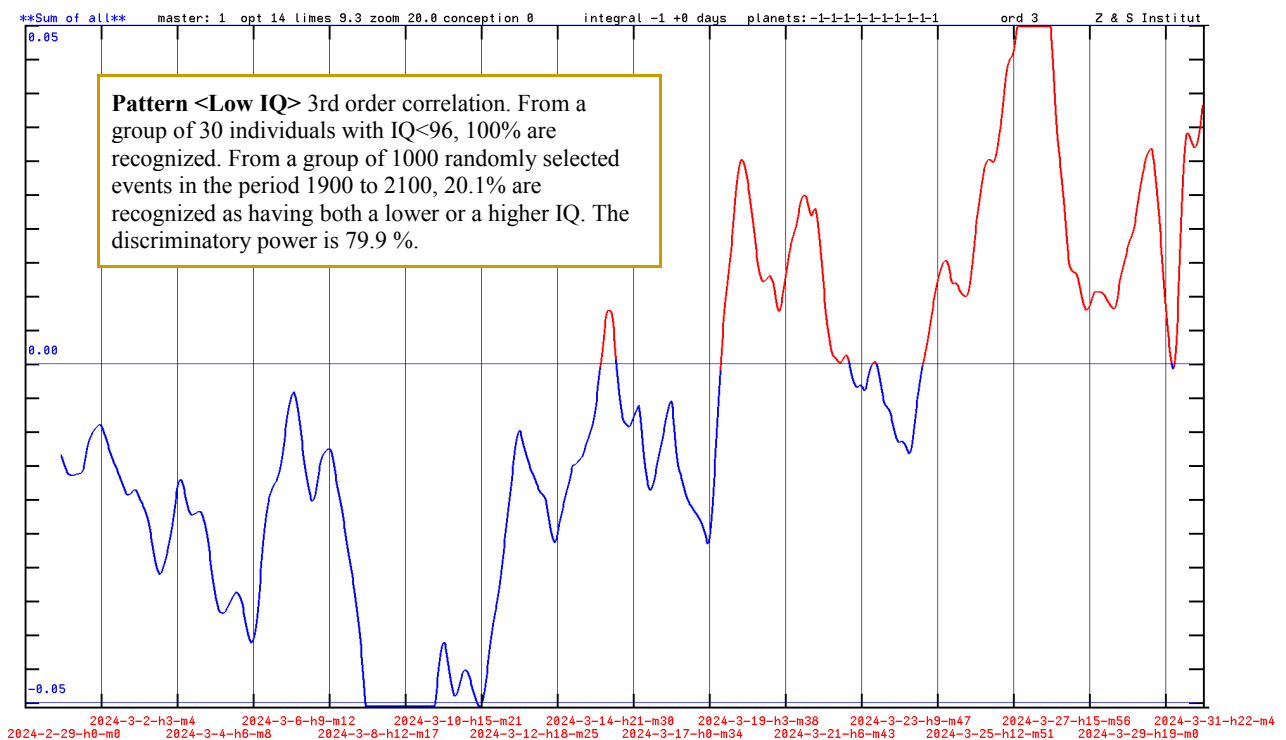

Fig. 6: The probability of a low IQ at birth in March 2024. If the curve is above the center line, then this time falls within the pattern for a low IQ.

Can these curves also be used for the start (birth) of projects?  
 There are no studies on this yet. But it could be a hypothesis.

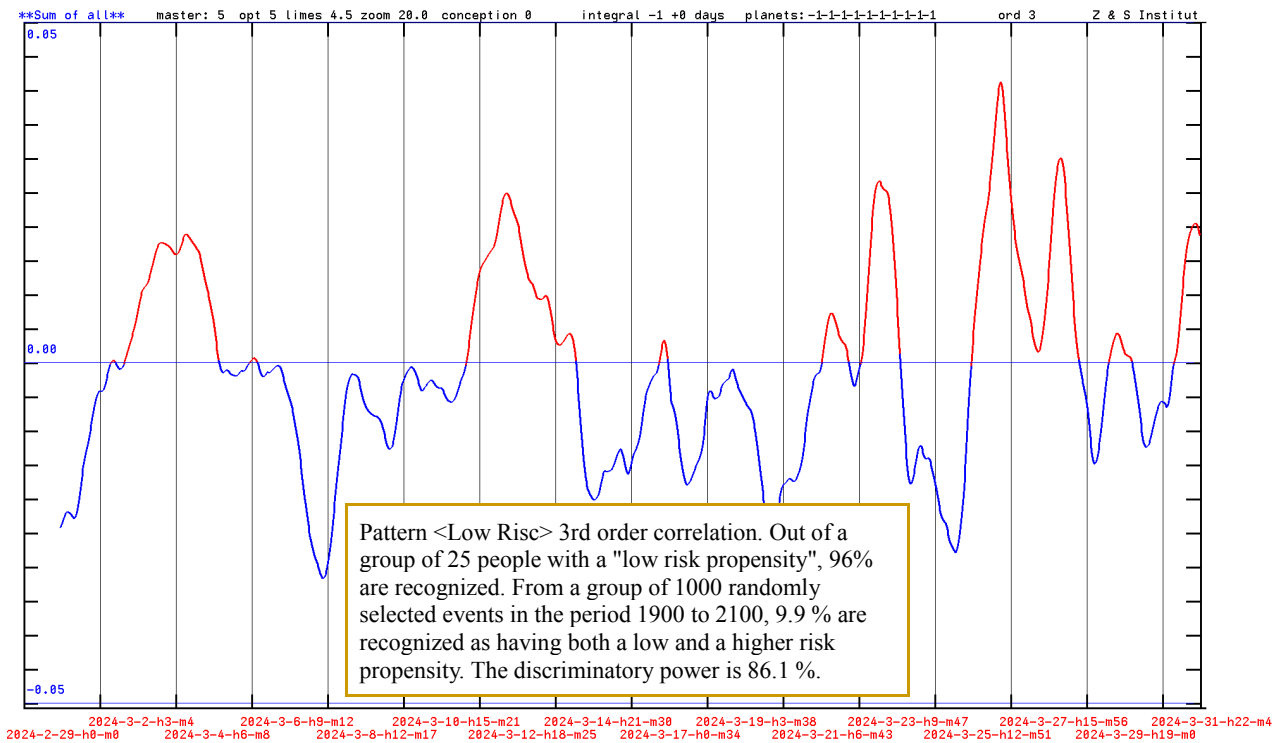

Fig. 7: The probability for the characteristic "low risk appetite/strong need for harmony" when a person is born in March 2024. If the curve is above the center line, then this time falls into the pattern for a "low risk appetite/strong need for harmony"

Even these few statistically verified studies indicate that there is still a large field for further research. To this end, groups of people with the same character traits must be examined. If such groups show significant deviations from the continuum (average), patterns can be created for forecasting.

**To interested readers:** If you know of any such groups of people with special, statistically verified character traits, you can send them to us for significance testing. If it is a characteristic that deviates from the average, we can create a sample.

## Artificial intelligence in the forecasting of earthquakes in March 2024

The fluctuating planetary gravitational field influences not only the activities of the sun, but also those on earth. A special correlation function describes the harmonics of these fluctuations. Groups of earthquakes form oscillation patterns that differ significantly from randomly selected control groups. These patterns are suitable as an element of an AI for assessing the probability of earthquakes.

### Pattern A

Group of the 41 strongest earthquakes of the last century (1900-2000)

*The pattern used here finds 100% of the list of the 41 strongest earthquakes. However, 25.8 % of the 1000 events are also identified as earthquakes from a randomly selected list. The discriminatory power (difference) to the continuum is 74.2 .*

Fig. 8: Curve of pattern A for the period 2024-03. Above the center line, the probability of a pattern A earthquake is greater.

### Pattern B

A list of 513 earthquakes (Earthquakes of magnitude 6.5 or greater or ones that caused fatalities, injuries or substantial damage. BRK--Berkeley. PAS--Pasadena. ) in the period 1997-01-05 to 2002-06-18].

82 % of the group of 513 earthquakes were recognized as earthquakes. From a randomly selected comparison group of 1000 events, 27% were identified as earthquakes. The comparison group of 1000 events was randomly selected in a period from 1900 to 2100.

Fig. 9: Curve of pattern B. 513 earthquakes for the period 2024-03. Above the center line, the probability of a pattern A earthquake is greater.

**Important:** This does not rule out major earthquakes.

## Planning the birth date of a baby in the month of March

Planning the birth of a child depends on many circumstances and conditions. The social circumstances of the partners, the time available and also the physical possibilities are significant influencing factors. Planning is easier if only artificial insemination is possible.

The patterns currently being developed from the harmonics of the planetary oscillators (major planets) make it possible to specify time windows in which the change in the probability of higher (or lower) intelligence or lower risk behavior of the newborn can be seen.

The time windows are calculated for a month in which the day of conception (conceptio) takes place. The duration of a pregnancy from the day of conception is given as 268 days. This is a statistical mean value that has a range of fluctuation.

The following curves show the time quality for the various patterns for 268 days later than March 2024, i.e. approx. 8 months + 24 days.

### Pattern <High IQ>

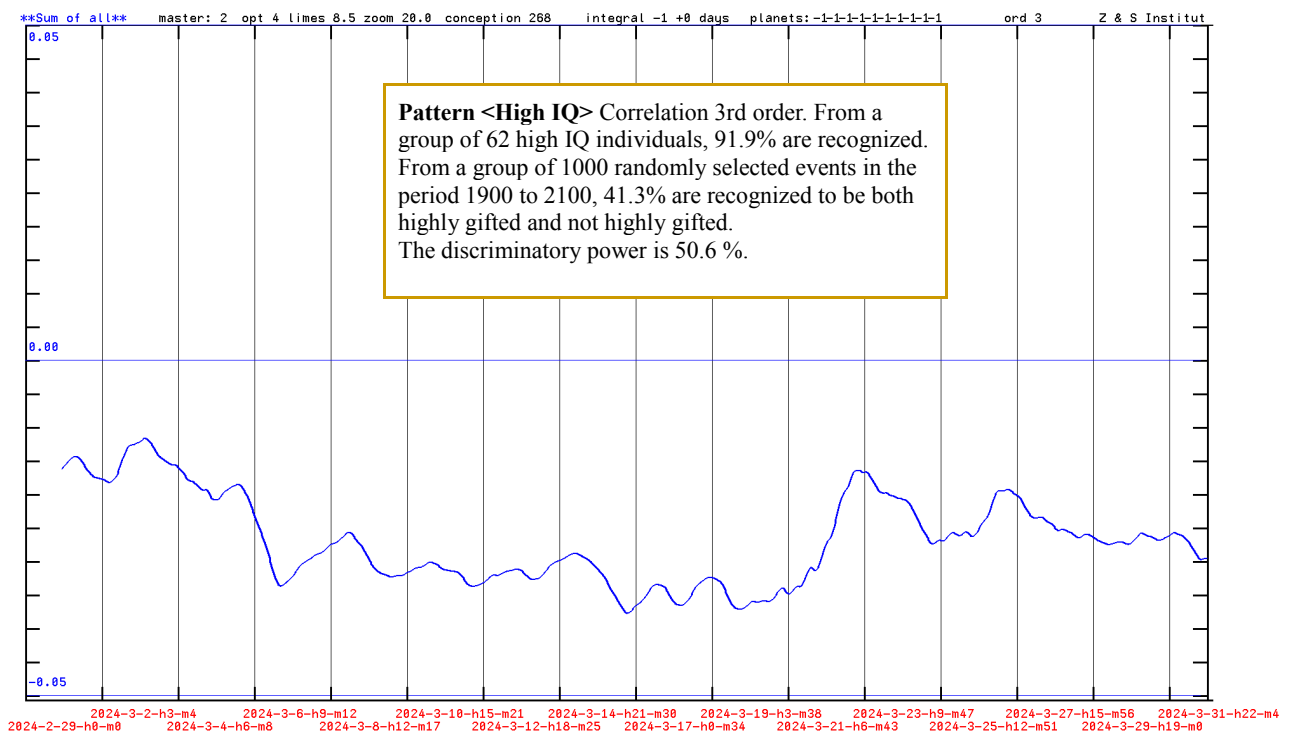

Fig. 10: The probability of a higher IQ at conception of an intended pregnancy in March 2024. If the curve is above the center line (red part of the curve), then this time falls into the "High IQ" pattern for high achievers. The birth takes place 8 months and 24 days later than March 2024.

### Pattern <Low IQ>

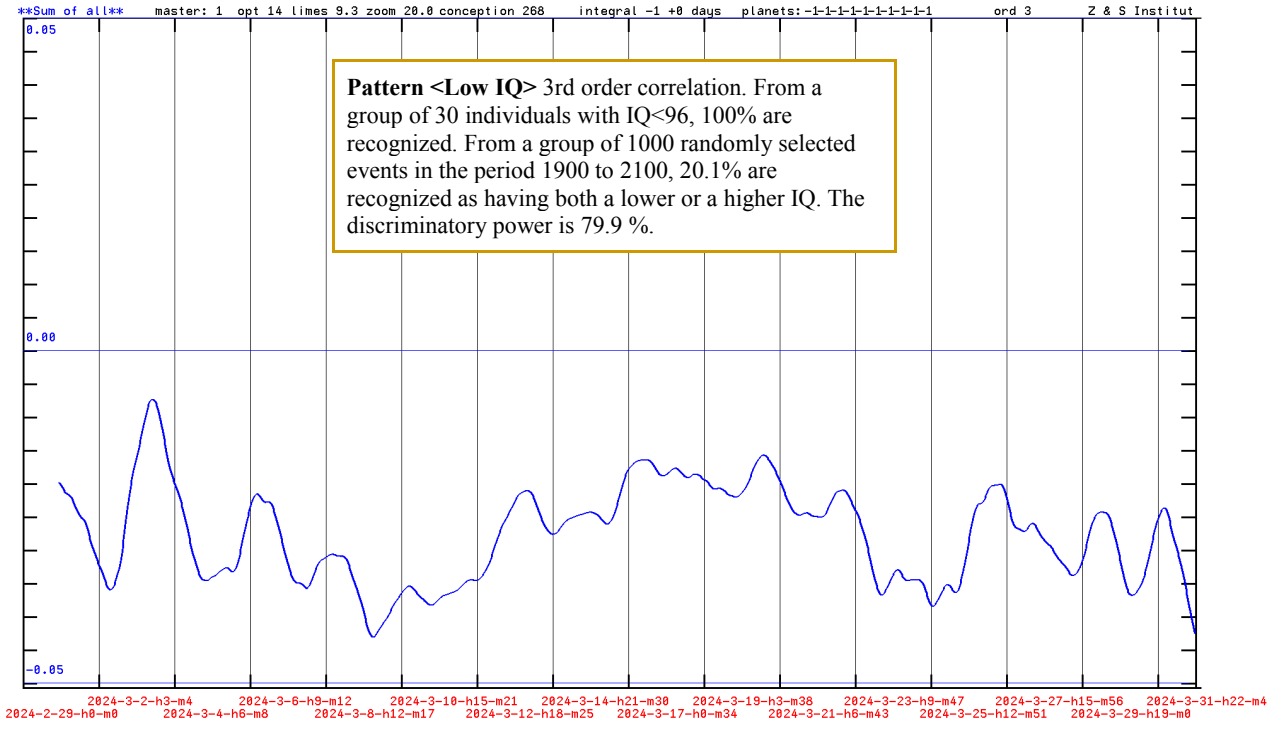

Fig. 11: The probability of a lower IQ at conception of an intended pregnancy in March 2024. If the curve is above the center line (red part of the curve), then this time falls into the "Low IQ" pattern. The birth is 8 months and 24 days later than March 2024).

### Pattern <Low Risc>

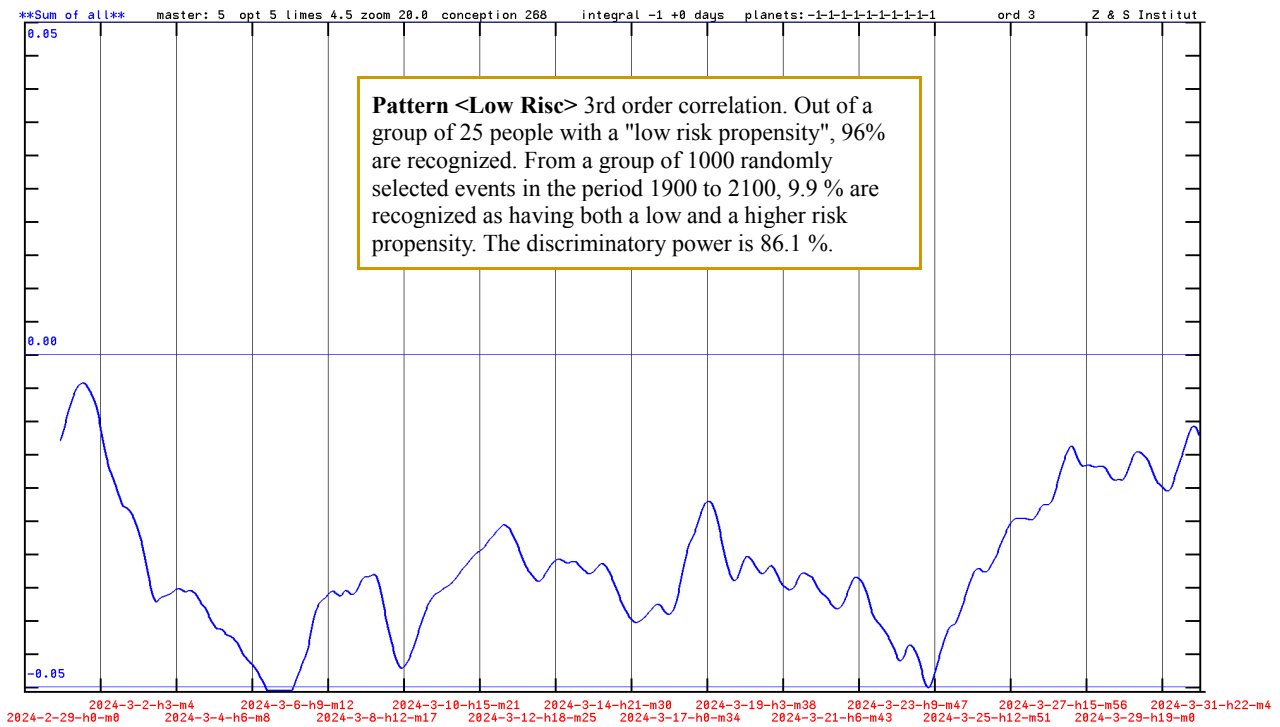

Fig. 12: The probability of a lower risk of conceiving an intended pregnancy in March 2024. If the curve is above the center line (red part of the curve), then this time falls into the "low risk" pattern. The birth takes place 8 months and 24 days later than March 2024.

Please note: The changes in the probability for a higher IQ, for a lower IQ and for a lower risk probability of the child are relative to the genetic disposition and are no guarantee for a really high intelligence or a low risk propensity of a child.

### Individual biographical rhythms 12 to 24 years

The rhythm curves previously published in this magazine always referred to an average orbital speed of the planets. The current orbital speed and the retrograde motion of the planets were not taken into account. Therefore, individual biographical rhythms may deviate from these statistical averages. (see edition 2024-02)

Are there harmonic and disharmonic periods that apply to all generations? For this purpose, 1000 years (1500 to 2500) were calculated with an increment of 3.6525 days. The calculated curves were superimposed. The result is shown in Figure 15. The graph shows the areas that are likely to be harmonious (red) or disharmonious (blue). If there are only harmonious red areas in a life stage, the probability is very high that all individuals of a generation are harmonious in these periods.

**Fig. 13** Mean biographical rhythms from 12. to age of 24. Primarily is it the superimposition of the major planets Jupiter and Saturn. Uranus begins with a weak harmonic and disharmonic influence.

Figure 14 shows the growth of the reproductive organs according to "Tücke, developmental psychology". It can be clearly seen that growth begins in the middle of the 14th year of life and then has the greatest growth gradient in the 15th year of life.

**Fig. 14** Reproductive organ growth\*

Fig. 15 Biographical rhythms from the 13th to the 24th year of life for the period from 1500 to 2500.

The period from 12 to the beginning of the 14th year of life is predominantly harmonious. The puberty phase from the 14th to the end of the 15th year of life shows a phase of life at the beginning of the 15th year of life that is always disharmonious and characterizes the disharmonious character of this phase. The presence of red (harmonious) and blue (disharmonious) sections indicates that the individual curves of puberty begin at different times and can also have different lengths as well as different highs and lows.

A short, predominantly harmonious and stable phase begins at the age of 16 and ends after just six months. This phase of life, a high point of adolescence, can also begin as early as the age of 15 and last until the end of the 16th year.

At the end of the 17th year until the end of the 18th year, a predominantly disharmonious period follows. This is a period in which many young adults leave the parental home. This is followed by a stable and harmonious period, when the departure from the parental home is successful and new perspectives open up, which can soon lead to a longer crisis, the quarter-life crisis, which lasts until the age of 23. This crisis is initiated by Jupiter and Uranus, whose first major disharmony occurs in the course of life. The climax of this crisis is then characterized by Saturn and Uranus.

## **Fluctuations of the planetary gravitational field and nonlinear interactions with matter.**

### *From the preface to the book*

The hypothesis presented in this book arose by chance. My experience in creating a mathematical model for calculating partially-coherent light waves through optical systems, applied to the planetary system, led to an algorithm that can be interpreted as a nonlinear interaction of microgravity with matter. This does not describe causalities but only correlations of a probabilistic nature. A correlation function is developed that can describe changes in the probability of stable and unstable states in matter.

With the found correlation function the triggering of earthquakes was investigated as the first.

...

Previous studies related to the triggering of earthquakes do not take into account the interactions of the gravitation of the planets.

The studies of groups of earthquakes showed significant deviations from the control groups and confirmed the assumption that the harmonics of the planetary gravitational field have an influence on the triggering of earthquakes. Surprisingly, it was not only the harmonics of the Sun and Moon. These results suggested that it might be possible to use these harmonics to predict earthquakes as well, which was also confirmed that the correlation function found could be used to predict changes in the probability of earthquakes.

It was further suggested that the fluctuations of the planetary gravitational field could also have a stabilizing or destabilizing influence on other processes of evolution on Earth. The correlation function was applied to the structure formation of human intelligence and the stability of mental processes. Again, significant results were found in the statistical studies.

The results so far suggest that the correlation function may be suitable for describing influences on further processes of human evolution. The method can also be applied as an element of an artificial intelligence, ...

Michael E. Nitsche

In this book, the structure formation of human intelligence, the stability of mental processes, the developmental psychology of humans, social events and crises, but also the triggering of earthquakes are investigated on the basis of the planetary gravitational field. The fluctuating planetary gravitational field forms frequency patterns that can be used for predictions in an artificial intelligence.

### ATLANTIS - 3045

*An age lasting a thousand years comes to an end. It will later be called the Dark or Leaden Age. In secret, underground, in the caves and catacombs, something has developed that feels the power to beauty, harmony and eternal youth. Perhaps this will develop into an Atlantean, a Golden Age. Do we still speak of man, mankind even? No! It has reached the end of its evolution. Greed, laziness and fear, these driving forces of human civilization have reached the end point. Stupidly naive moral conceptions of a human herd and extremely decadent ways of life of an elite left only one exit open: Suicide - apocalypse. The brutal competition of the male aggression for the offspring and the female greed for the greatest male aggression for the own offspring, originating from the animal kingdom, could not be changed, for it ideologies and religions were insurmountable obstacles. Parts of mankind survived through artificial wombs and virgin birth. The male part no longer existed. A mostly peaceful world in harmony with nature emerged, a decaying world in which what was once technology became increasingly rare. A small pool of male children was raised for safety in a secluded reservation kept strictly secret from the rest of the population. With the onset of puberty, these specimens were transformed into girls. But the male element had not yet been completely defeated, when it happened that something succeeded which nobody had thought possible. An ancient dream of mankind was about to become reality. The dream of eternal youth. In a research institute that was working on the adaptation and optimization of virginity production, there existed a small research group that was allowed to conduct genetic experiments on the remaining male gene pool. There they succeeded in designing a male specimen of a new human being, with the potential of eternal life. But these specimens of a new man would allow very little differentiation; they were like identical twins and loved each other as such. Would it become a blessing or a curse to humanity? It was decided to destroy this small male gene pool immediately. But time had its own plans. On an island in the Atlantic Ocean, something existed that was created before the apocalypse and was supposed to allow high technology to survive. It survived without humans, although it was made for them. After it had a thousand years to find a way, it began to stir. The world was changing and had its own goals, beyond humans.*

## Guest posts

Do you have individuals, groups of individuals, special events or groups of events?

We will review you and, if suitable, conduct research and publish the results with you in our journal or in an international peer reviewed journal.

## Your own research?

If you intend to conduct your own research independently of us, you can purchase the astro-basis program (manual here: <http://www.planetare-korrelation.eu/program-astro-2.htm> ). With this program all research results were obtained, which were published in the international journals

*Earth & Environmental Science Research & Reviews;*

*International Journal of Clinical & Medical Informatics;*

*Journal of Robotics and Automation Research;*

*Journal of High Energy Physics, Gravitation and Cosmology;*

were published.

For further requirements you can also purchase the astro-extended program (manual here: <http://www.planetare-korrelation.eu/program-astro-extended.htm> ). This program can among other things also carry out resonance examinations (transits) statistically secured.

**Contact us, we will advise you!**

## Contract research for your personal questions

**Do you need quality time for personal appointments, births, or groups of people?**

We calculate the time quality matrices for you with statistical tests for significance.

For one appointment we will charge you 80,-€, for groups up to 30 events or persons 120,-€.

## Sponsoring

**Would you like to support our research financially?**

Please get in touch with us. Your support can also refer to individual studies, for example. An internationally published research article can then include the addendum: "This research was conducted by ..... *Your name or company*.... sponsored. In addition, your name or company can - if you wish - be published on our homepage with a link.

**Contact us, we will advise you!**
